And if we harp persistently on that one string, it is because individuality is the dominant and distinguishing quality of our suits.

Individuality which commences with rich fabric effects—which continues with strokes of genius in the design—and which concludes with those custom touches in the tailoring which we originate and specify in these garments made individually to our order.

Mrs. Buckman read a paper on "Americanizing the Immigrants." Mesdames Schmidt and Sevy played a piano duet. The retiring president, Mrs. Spencer, spoke to the club and their husbands. J. B. Sevy responded. F. E. Schmidt gave an original poem on Stanfield. Mrs. Connor presented the guest of honor, Mrs. Schmidt with a bouquet of snowballs. The number of flowers represented the members of the club. She called attention to the fact that the formation of the flowers were round, which represented the chain of friendship.

How Time seasons Soldiers and mellow Tobacco

The raw recruits "hayfoot" and "strawfoot" in the awkward squad. But they are good material. A year or two passes. And now you see seasoned soldiers—trim—erect. Time and discipline have done their splendid work.

Peculiarly—the OWL Cigar is much the same.

A stock of selected leaf joins the great OWL leaf reserve—the leaf reserve which always totals \$1,000,000 in value. And quite often more.

Under the keen eyes of watching experts this leaf cures and mellow for many months. Finally, after more than a year, it reaches the "peak-point" of OWL fragrance. Time-curing has done its work. Time-curing has blended and mellowed the selected OWL leaf to the very turn of fragrance. The OWL leaf is "ready" for your OWL Cigars.

Why don't you fry an OWL Cigar and see how really fragrant a smoke time-curing can produce.
