LIVE NEWS OF THE NORTHWEST

PORTLAND, Ore., July 25.—The tenth annual shoot of the Pacific Indians ended here today after a four-day program. Trophies were awarded today and the annual meeting of the association will be held late this afternoon or tonight.

BONNEVILLE, Ore., July 25.—Governor James Withycombe, of Oregon; Mayor George L. Baker of Portland, and other state and city officials today are gathered here at the annual picnic of the Portland Retail Grocers' association. Such good, old-fashioned sports as a three-legged race, a married women's race and a sack race are on the day's program.

PORTLAND, Ore., July 25.—Oregon's potato output this year will exceed the 1916 yield by 10,000 cars, according to the estimates of dealers here today. Potatoes are one of the big items in food shipments, and the Oregon public service commission is urging farmers and dealers to ship their potatoes as early as possible so that transportation facilities may be released for other crops as soon as possible. The commission has issued the following instructions to shippers: "Do your shipping today, while cars are available. Store fuel and other crops ahead."

"Load and unload cars the day you receive them, regardless of the 48-hour free time limit permitted by our demurrage rules. "Ask for cars only when certain of being ready to load. "Give the railroad company immediate notice when car is released. "Load cars to full capacity (10 per cent above the marked capacity.) "Bear in mind freight cars are for the transportation of goods and are not freight warehouses, and while they are waiting for loading or unloading, they might as well be out of existence."

CLACKAMAS, Ore., July 25.—Oregon's national guard is gathering here today—mobilizing for training preliminary to actual service in Europe. Train after train brought militiamen from every part of the state. Under present plans, the men will stay here for several weeks and then go to Palo Alto, Calif., where they will be put through intensive training before being sent to France. Coast artillery companies are mobilizing at Fort Stevens. Adjutant General White did not receive orders from the war department to mobilize his regiment at Clackamas until Monday. Supplies of all kinds are being hurried here for the big body of troops.

AMERICAN LAKE, Wash., July 25.—The American Lake cantonment camp will be completed on schedule, or by September 1, said contractors and army men here today. Half of the 198 large barracks are in some stage of construction here today. Stables are being hurried, and scores of smaller buildings are under course of construction. Water, electric and sewer systems are being put in. Field Hospital Unit No. 30, from Portland, is established here. Other military units are assembling, preparatory to the great mobilization which will take place late in the summer and early next fall.

The more some people tell us the less we know.

The man with the alcohol nose is true to his colors.

MARKED INCREASE IN RECEIPTS FROM THE NATIONAL FORESTS

PORTLAND, July 24.—The gross receipts from the National Forests of Oregon, Washington and Alaska, comprising the North Pacific District of the Forest Service, for the fiscal year ending June 30, 1917, were \$644,875.57, according to a report just compiled in the office of the District Forester Geo. H. Cecil, Portland, Oregon. Refunds due to excess payments for timber or forage were made to

the amount of \$8,761.39, leaving the actual receipts for the year \$636,114.18, which is nearly \$150,000 greater than the receipts for the year 1916.

Of this amount, \$450,000 was derived from the sale of National Forest timber in the District, and \$185,600 from grazing permits. Special use permits brought in \$11,000. The remainder came from power sites, timber settlement, and timber and grazing trespass.

Whitman Reserve Leads. The Whitman National Forest in eastern Oregon leads the district in

the amount of receipts from all sources with a return of \$119,533.20. Of this amount \$107,500 was derived from the sale of timber. The Crater National Forest stands second with a total return of \$95,957.69. Ninety-two thousand dollars of this came from timber sale business. The Tongass National Forest in southeastern Alaska received \$60,443.05.

Other Forests in the District which brought in large returns are the Wallawaw, \$46,844.48; the Olympic, \$39,232.28; the Rainier, \$28,012.13; the Columbia, \$25,184.32; the Malheur, \$22,804.24, and the Umpqua, \$21,212.74.

In receipts from grazing permits, the Wallawaw National Forest leads with \$24,554.57. The Malheur ranks second with \$21,471.46; and the Fremont forest third, with \$15,137.14. Other forests doing grazing business in excess of ten thousand dollars for the year are the Wenaha, the Minam, the Coquico, the Okanogan, and the Whitman.

Alaska Ahead in Special Uses. The National Forests in Alaska lead in amount of receipts from special uses. The Tongass Forest received \$4020.42 and the Chugach Forest \$1030.00 from this source.

The receipts from water power business on the Tongass National Forest were \$1327.50, which is the highest in the district. The Oregon stands next with \$1325.12, and the Whitman third with \$843.50. Other forests doing more than \$400.00 worth of water power business for the year are the Washington, \$775.73; the Watachee, \$692.10; and the Minam, \$490.70.

Twenty-five per cent of the total receipts from National Forest business will go to the counties in which the forests are located as part of the road and school funds. Ten per cent more will be used in the construction of roads and trails within the National Forests. In round numbers this amounts to \$159,000 and \$157,000 respectively. The states of Oregon and Washington further benefit in the sums of \$127,000 and \$92,000, respectively for Forest roads, under the Strackelford act.

PRACTICALLY ALL STORAGES REPORT Full Records of Meat, Poultry, Etc., Given Voluntarily to Government.

WASHINGTON, July 24.—Practically every storage company in the United States is now cooperating with the government in reporting the cold storage holdings of food products, according to a statement just made by the bureau of markets, United States department of agriculture. These reports include meat, poultry, eggs, butter, cheese, and apples and are issued monthly by that bureau.

When the work first started, in 1914, the bureau says, only a few firms reported in response to the requests for information; and there never has been any legislation which made the submitting of these reports compulsory. Gradually, one firm after another volunteered its reports, until now the field is almost completely covered. The importance of the statements of storage holdings never has been so great, in the opinion of the department, as it is today in connection with the world food crisis.

Value to the Public. Through the cooperation of the press the public is kept informed of the facts and the officers of food administration, for example, are able to make specific recommendations on the basis of the reports. No monthly cold storage statement issued by the department gives less than 95 per cent of the entire holdings and most of them are fully complete. The margin of 2 per cent or less is partially due to delay in reporting, because of unusual conditions at a warehouse at the time the reports are due on the first of each month. Even then a telegraphic request from the department usually brings a wired answer which fills out the report.

On the present meat situation, for example, the report shows that there is a storage response to the prospective demands for war emergencies, and that more than a hundred million pounds of frozen beef are in storage, or more than half again as much as was on hand last year at the same time. Moreover, during the month of June this year the storages kept on increasing their stocks and added nearly five per cent to what they already had on hand; whereas in 1916 the storages which reported showed greatly reduced supplies, a one-fourth of twenty-five per cent decrease being noted during June a year ago.

A BUFFALO INSTITUTION Known All Over the United States

Dr. Richard C. Cabot, who is head of the Massachusetts General Hospital, has been writing for the American Magazine, April and May, on the subject of "Better Doctoring for Less Money."

He says that "A new era has come in the practice of medicine, but most people do not know it yet. We have begun to emerge from that stage of medical work in which the doctor was a peddler selling goods from house to house, into the more advanced sensible era in which the doctor stays at his place of business, like anyone else who has goods to sell, and the people who want these goods come to him. The shop where he has his goods to sell is generally called a hospital and he has associated with him there a body of men and women similar to work people, foremen and managers of any industrial plant or dry goods store. He has there some beginnings of a satisfactory division of labor and specialization of function. Therefore, he can give the public a much better article for less money."

The article I refer to is sound medical advice and treatment."

This is just what Dr. Pierce has been doing at the "Invalids' Hotel" in Buffalo, New York. Dr. V. M. Pierce has associated with him Dr. Lee H. Smith, who is vice president and head surgical director and operator, and there are a dozen other physicians and specialists, as well as four chemists, and the poor and the very rich get the best medical attention. As Dr. Cabot has properly said, "When you go to a doctor's office you may complain of nothing more abstruse than a headache or a stomach-ache, yet for the solution of the problem presented by your suffering there may be needed an X-ray examination, chemical tests such as very few experts are capable of making, the consultation of experts in diseases of the eye, the ear and the throat, and the

study of the improvement or aggravation of symptoms at different times of day and under different diets and temperatures. This study demands the conditions found in just such a hospital, and nowhere else is had without great expense." It is also true that the "family doctor does the best that he knows how, and considering the difficulties under which he works, makes a wonderfully good estimate of the nature of the patient's disease and the treatment to be administered."

"But as an accurate diagnosis simply cannot be made in a considerable number of cases without the cooperation of a number of men, each expert in his own field, what we ask the family doctor to be is an 'all-around' specialist. This he attempts, but one cannot truthfully say that he succeeds, for the attempt is obviously an impossible one. Medicine is today far too large and complicated a field for any one man, no matter how wise and experienced to cover."

We have not the space to speak individually of the professional men composing the faculty of this old, world-famed institution, but will say that among them are many whose connection with the "Invalids' Hotel" and Surgical Institute has rendered them experts in their several specialties.

Advantages of Specialists. By thorough organization and subdividing the practice of medicine and surgery in this institution, every invalid is treated by a specialist—one who devotes his undivided attention to the particular class of diseases to which the case belongs. The advantage of this arrangement is obvious. Medical science covers a field so vast that no physician can, within the limits of a lifetime, achieve the highest degree of success in the treatment of every malady incidental to humanity.

NEW POLICE MACHINE GUN

Here is shown a new type of machine gun recently tested by New York policemen. The weapon can be attached to the rear of an automobile or other fast-moving vehicle and rapidly rushed to any point where danger threatens. It is both deadly and accurate, and will, it is believed, prove a valuable acquisition to the department's equipment.

How Long Must I Suffer From the Pangs of Rheumatism?

Is there no real relief in sight? Doubtless like other sufferers, you have often asked yourself this question, which continues to remain unanswered. Science has proven that your Rheumatism is caused by a germ in your blood, and the only way to reach it is by a remedy which eliminates and removes these little pain demons from your blood. This explains why liniments and lotions can do no permanent good, for they cannot possibly reach these germs which infect your blood by the millions. S. S. S. has been successfully used for Rheumatism for more than fifty years. Try it to-day, and you will find yourself at last on the right track to get rid of your Rheumatism. You can get valuable advice about the treatment of your individual case by writing to the Chief Medical Adviser, Swift Specific Co., Dept. D Atlanta, Ga.
