We Have Neither the Time Nor the Desire

To refer, either in our store or in our advertising, to the methods, prices and advertising of our competitors. Our own business keeps us busy and we are entirely satisfied to let others run theirs in their own way. "Knocking" only hurts the "knocker." We determine what we shall buy, the quality of it, and the price it will sell at, without wondering or worrying what our competitors will do. After all, isn't it true that you can't get "something for nothing," and that at most stores you get exactly what you pay for?
