### PROHIBITS IMPORT OF HOG PRODUCTS

LONDON, Sept. 4.—The King today signed a proclamation prohibiting the importation of bacon, butter, hams and lard, except under license.

The object is to enable the government to take over their entire purchase and concentrate it in various countries in a single organization.

The Food Ministry is establishing in the United States a single buying agency, and will make all purchases through this agency, beginning on Sept. 3. All holders at the present time of c. i. f. and f. o. b. contracts in bacon and lard with American shippers are required to furnish to the Food Ministry full information immediately.

Pending further arrangements, licenses will be granted certain importers of bacon, ham and lard from other countries than the United States to continue imports. Consignments of Canadian bacon will be under the same restrictions as American goods. A statement issued by the Food Ministry says:

"It should be borne in mind that importers' prices are mainly determined by the market prices ruling in foreign countries, over which the Food Controller has no control and that they must be maintained at such a figure as to insure the regular shipment to this country of adequate supplies. Producers' prices also have been fixed for home-produced bacon, ham and lard."

## The Most Beautiful Car in America

Paige cars have long since demonstrated their independence of all "price fields."

American men and women now buy a Paige—not because of the price tag which is attached to it—but because of its well established reputation as a fine mechanical product.

On this basis, the Paige will always represent a "preferred investment" among motor cars. Its actual cost in dollars and cents will always be an important, but an altogether secondary consideration.
