HEAD CONSUL BOAK WILL PAY OFFICIAL VISIT ON SEPT. 13

PENDLETON CAMP NO. 41, W. O. W. PREPARES TO RECEIVE DISTINGUISHED GUEST

Will Be Accompanied by Deputy Head Consul E. P. Martin; Twenty-Eight New Members to be Initiated On That Date.

Pendleton Camp No. 41, Woodmen of the World, has about completed arrangements for an official visit of the head consul, L. I. Boak, on Thursday evening, the 13th inst. He will be accompanied by Deputy Head Consul E. P. Martin. The camp has been working on a thirty-day campaign for new members, with the result that they have secured twenty-eight new applications for membership, who will be initiated on the above date, at which time the new ritual will be exemplified by the local team under the direction of the head consul. It is anticipated that there

L. I. Boak, Head Consul of the Woodmen of the World.

will be a very large attendance that night, as a great many of the membership of the camp has not yet seen the new ritual exemplified.

Head Consul Boak is very prominent in fraternal beneficence, society work having during the past year been president of the National Fraternal congress, and having just returned from the annual meeting of that society at Chicago, and has a message of great importance to deliver to the membership of the camp.

Head Consul Boak is a very loyal patriotic American. He says, "I do not hesitate to say and recommend to this congress and to every constituent society, that instead of charging our members who enlist or are drafted into the service of their country, an extra rate, we should charge them absolutely nothing for their protection, during the period of their enlistment. Possibly we could do more than that, but certainly we should not do less. By going to the front and braving their bullets to the bullets of a relentless enemy, they are doing a thousand times more for us than we can do for them. They are leaving home and loved ones. They are leaving most of their possessions of property, for which they have spent years in preparation, life's plans and life's hopes are to be sacrificed on the altar of war, that the principles represented by that flag for which our fathers and forefathers sacrificed their lives and their fortunes, first in 1776, then in 1812 and 1848, and again in '61 to '65. We are the beneficiaries of those early struggles for American independence, living in full enjoyment of all the benefits that come to a free people and now our own sons are called to defend the honor and integrity of the American republic against the autocratic rule of a cruel policy of foreign countries, and shall we not say to them, 'Go, my brother, go in answer to your country's call and during your absence, we, whom you represent, we, your fraternal companions will stand four square in defense of your home and loved ones, and your fraternal membership wherever it may be, during your absence shall not become impaired.'"

All neighboring camps of the order have been invited to be present and to participate in the meeting of the 13th.

All members of the camp and order in the city are expected to be present and will beyond a doubt enjoy a very profitable and interesting meeting. It is the head consul's desire to meet personally every member in the city that night.

District Manager John P. Hoyt, who has been in the city for the past month helping the local membership in this campaign, has been very enthusiastic and tireless in his work, and has been ably assisted by the campaign committee, composed of Frank Cook, V. Stroble, P. A. Anderson, A. O. Carden and Ralph Gravelle, as well as many of the other members of the local camp.

ITALIAN AVIATOR FLIES 920 MILES WITHOUT STOPPING

Sets New Long-Distance Record in Going From Turin to Naples and Back

PARIS, Sept. 7.—Capt. Giulio Laurani, an aviator in the Italian army, has established a new world-long distance flying record by flying more than 900 miles without stopping, according to a dispatch to the Temps from Milan. The Italian flew from Turin to Naples and back a distance of 920 miles. The best previous nonstop flight was 807 miles.

Capt. Laurani used a new S. I. A. machine. He left Turin at 10:30 A. M. The new machine was back in Turin at 5:45 P. M.

Exhausted After the Day's Toil

PAULINE FREDERICK, FAMOUS PLAYERS STAR IN PARAMOUNT PICTURES.

"I'd just love to be in motion pictures." That has been the cry and ambition of millions of people, believing in their hearts that it is the easiest position they could possibly aim for. But they are wrong. It's work, and hard work, from early in the morning until late at night. Work that so fatigues one that there is little wonderment that Pauline Frederick would appear to be exhausted after the day's toil. On this occasion she began long before seven o'clock and was in the studio until three o'clock the following morning.

EX-CZAR'S BROTHER IN REVOLT CELEBRATION

WASHINGTON, Sept. 7.—Charles Edward Russell, Socialist member of the House of Representatives, today told the following interesting experience in a prepared speech.

I was walking along the Nevsky Prospekt with a friend, viewing a gigantic demonstration of 500,000 people celebrating the victory of the revolution when I observed coming toward us a tall, well-groomed and well-dressed gentleman. His dress was as richly as his own. He was swinging a cane and smoking a cigarette. Do you know who that gentleman was? He was the former Czar's brother-in-law, the Grand Duke Michael, brother of Ex-Czar Nicholas.

"The former heir apparent to the throne of all the Russias seemed quite pleased with the demonstration. He was having a jolly good time and appeared to care very little for the fate of his brother or the fact that he was now simply 'Mikhail Alex. andovich Romanoff.'"

MINING COST CUTS GOLD YIELD

Alaska Will Not Send Out Former Quantity of Product.

DAWSON, Sept. 7.—After completing a tour of the gold camps of the Yukon, Volney Richmond, superintendent of the Northern Commercial company, says that there will be a considerable falling off of the gold yield this year. He attributes this not to a lesser amount of gold available or to a lesser amount of gold available or to any lapse of the supply, but to the higher cost of mining in low grade ground. The Klondike yield proper, however, is holding up to almost normal this far.

KANSAS ROADS SEE TO BREAK 2-CENT PASSENGER RATE

Nine Companies File Petitions for Injunction Against Utilities Commission.

TOPEKA, Kan., Sept. 7.—Nine Kansas railroads have filed bills of complaint in the United States district court asking for an injunction to restrain the Public Utilities commission from enforcement of the 2-cent passenger rate and also asking the court to declare the 2-cent pas-

Wenger Rate Statute Unconstitutional and Confiscatory

The railroads in their appeal for relief to the United States district court vary from their usual custom of asking for a temporary injunction awaiting final decision of the court. They ask no relief until a final judgment is rendered at a hearing to be held probably in November.

The Utilities Commission recently decided the 2-cent law should be enforced, and the railroads are appealing from that decision in their complaint.

FIRE RAGES CENTRAL OREGON

Covers Territory 10 Miles Wide by Three Deep in National Forest.

REND, Sept. 7.—Central Oregon's worst fire of the season was raging today in the Port Rock section, 20 miles south of Bend. Starting on Sunday afternoon at a point northeast of Port Rock, the fire spread rapidly until today it covered a territory 10 miles wide by three miles deep, partly within the Deschutes national forest and partly on timber of the Fremont Land company one of the Sheelin interests. The fire was being fought desperately.

Insulation

Every part of your electrical system must be made leak proof by insulation.

Inside your battery is the most important insulation of all—that which separates the positive from the negative plates, for this prevents the battery from "short circuiting," and thus putting the whole system out of commission.

In the Still Better Willard, the insulation is made of durable, acid-resisting rubber.

Thus Willard Threaded Rubber Insulation means a better insulated battery, a more durable, more efficient battery.

Ask us about the remarkable service achievement of Still Better Willards on 35,000 cars.
