

ROUND-UP SOUVENIR EDITION

PENDLETON, OREGON, FRIDAY, SEPTEMBER 21, 1917

Panoramic Views Shows Picturesque Setting in Which Round-Up is Held Each Year, Indian Tepees Are a Feature

Much of the charm of the Round-Up, for the outside visitor, comes from the fact the setting is picturesque and in harmony with the idea of a great out of door frontier show. Opposite the gigantic grandstand the Umatilla river flows through a grove of cottonwoods that makes an ideal camping place for the Indians assembled for the Round-Up. Tepees by the score are to be seen with the braves, squaws and children, all fresh from their reservation homes, living the out door life much as did their ancestors many years ago. Across the Umatilla river and completing the foreground for the Round-Up audience may be seen a glimpse of the long, rolling hills so typical of the eastern Oregon country. The accompanying picture shows a partial view of the Round-Up grandstand, the east bleachers and a few of the Indian tepees in the cottonwood grove by the river.

9 YEARS OF
UNPARAL-
LELED
SUCCESS IN
THE FIELD

BLEWETT

Combined Harvesters

231
MACHINES IN
SUCCESSFUL
OPERATION
In Oregon,
