Experience the Best Teacher. It is generally admitted that experience is the best teacher, but should we not make use of the experience of others as well as our own? The experience of a thousand persons is more to be depended upon than that of one individual. Many thousands of persons have used Chamberlain's Cough Remedy for coughs and colds with the best results, which shows it to be a thoroughly reliable preparation for those diseases. Try it. It is prompt and effectual and pleasant to take.—Adv.

SOFT COAL PRODUCTION DROPS 3,000,000 TONS IN A MONTH Unless Mining Increases, Shortage in New England, West and Northwest is Feared.

WASHINGTON, Sept. 24.—Reports to the Geological Survey show a decrease in bituminous coal production during August at the rate of more than 3,000,000 tons a month and indicates a shortage for this winter, unless production shows a decided increase.

The sections most likely to suffer are New England and the West and Northwest. New England has been hampered by the withdrawal from coastwise traffic for transatlantic trade of some of the fleet of vessels formerly engaged in transporting coal from New York to New England ports.

Reports to officials here say Canadian interests withdrew approximately 1,700,000 tons of bituminous coal from the United States during the period between the fixing of a flat coal price and the placing of the embargo. They are reported to have obtained this large stock by bidding from 25 to 50 cents a ton higher than

the price set by the government. Other contributing factors to the situation are the growing needs of France and Italy for coal with which to keep munition factories and other war time industries going.
