Food Administration Issues Orders That Less Sugar be Sold Confectioners.

MANY FACTORIES FORCED TO CLOSE

Order Hits Christmas Candy Business Hard; Many Workers Let Out.

WASHINGTON, Oct. 20.—The food administration has ordered that less sugar be sold to confectioners and other luxury manufacturers. The administration will not hesitate to curtail all luxury uses of sugar and many candy factories will be forced to close. It is estimated that 45 per cent of sugar is used in luxuries.

The order hits the Christmas candy business hard. The food administration acted with the hope that a complete shutdown of candy making would not be necessary, but this will be inevitable if the incoming beet sugar crop doesn't solve the shortage. The administration stated the beet crop should enable candy makers, who may be forced to close temporarily, to resume operations within a few weeks. The administration's order will be put into effect immediately through state food controllers and local committees. Today's order followed fruitless appeals for economy in the use of sugar. Thousands of candy workers are expected to be unemployed temporarily. Manufacturers anticipated the Administration's order will have this result, as well as closing hundreds of candy stores. The housewife may face a short period of sugar famine.

The following telegram was sent all sugar distributors: "We consider it essential to reduce completely the sales of sugar for the production of candy. It must be reduced in order to provide household and allied needs."

"This request applies to manufacturers of gum, confectionery, syrups and luxuries. The manufacturers of food products should have the preference, condensed milk companies coming first."

The Idaho team, piloted by Coach Bleamaster, Manager Edmundson and Captain Tom Jackson, arrived last evening, slipping in upon Pendleton unawares as advance information had been that they would not arrive until this morning. Coach Bleamaster brought 16 players with him. The O. A. C. squad in charge of Coach J. A. Pinal and Captain "Darkhorse" Newman arrived at 8:30 this morning on delayed No. 4 and were taken in buses to the field at Pendleton where the Idaho team was already gathered.

Coach Bleamaster took his men to Round-Up Park last evening and put them through light signal practice in order that they might get accustomed to the feeling of the field. Coach Pinal took his men to the field this morning. The field was wet down last night and both coaches declared it to be exceptionally fast.

Neither coach expressed himself before the game in optimistic terms but optimism isn't often handed out by football coaches. Coach Pinal stated that his team is lighter than usual and suffering from inexperience. "If Idaho springs some fast new stuff on my men, it is very hard to put them up in the air," he said.

Coach Bleamaster declared his team would not average more than 163 pounds but was full of fight and while he was not very hopeful of win-

Fast and Heavily Armed German Raiders Sink Vessels off Norway Coast.

THREE MERCHANTMEN IN CONVOY ESCAPE

Both Destroyers Believed to Have Been Built Since Beginning of War.

WASHINGTON, Oct. 20.—Provost Marshal Crowder has announced a new method of choosing men for the draft. A questionnaire will be sent every registered man not in service on a fixed date. All registrants will be required to return the sheet within seven days. The men then will be classified according to their economic status in five classes. Class one, will probably be composed of sound, single men first called, class two next and so on. The work of the local boards will be greatly simplified. Local boards upon receiving the filled out questionnaire will assign the men to one of the five classes. The announcement says the class to which the men are assigned will depend upon their economic worth as compared with their fellow registrants. The questionnaire, probably destined to become famous, will be known as number one thousand. The statement reads: "Classification will be based upon every conceivable condition from the family or occupational standpoint that should probably be advanced by the man desiring exemption. Every opportunity for appeal from such classification by the local board is retained and perfected, but the proceedings have been greatly simplified."

LONDON, Oct. 20.—The admiralty announced that 88 officers and men of the Mary Rose and 47 of the Strongbow were lost.

LONDON, Oct. 20.—The Mary Rose and Strongbow, two British destroyers were sunk in a battle between the Shetland Islands and Norway coast, the admiralty announced. The destroyers formed an anti submarine escort. Two very fast and heavily armed German raiders were engaged by the destroyers the admiralty stated. Fighting against heavy odds, the British held the Germans at bay until the three merchantmen in convoy had escaped. Neither of the destroyers are listed in the latest naval annual, and are therefore believed to have been built since the beginning of the war.

Five Norwegian and three Swedish unarmed merchantmen were sunk in addition to the destroyers.

The merchantmen were destroyed without examination of their cargoes and without regard for the lives of the passengers or crew. The raiders were evidently anxious to escape before other British forces interfered.

Need of Institutions in Eastern and Southern Oregon is Described.

EUGENE, Oct. 20.—State Superintendent of Public Instruction Churchill went on record today before the Oregon Congress of Mothers and Parent-Teacher Associations in favoring the establishment of two more normal schools in the state—one in eastern Oregon and the other in southern Oregon. Superintendent Churchill stated that 1000 teachers are needed every year, while the normal school supplies but 150.

More normal-trained teachers for positions now being supplied by high school students are needed, he stated. Superintendent Churchill declared the one-room school is the weak spot in the Oregon educational system and urged that provision be made for equipping especially trained teachers for this work.
