## Hopes Women Will Adopt This Habit As Well As Men

Happy, bright, alert—vigorous and vivacious—a good clear skin; a natural rosy complexion and freedom from illness are assured only by clean, healthy blood. It only every woman and likewise every man could realize the wonders of the morning inside bath, what a gratifying change would take place.

Instead of the thousands of sickly, enervated-looking men, women and girls with pasty or muddy complexions, instead of the multitudes of "nervous wrecks," "run-downs," "brain fags" and pessimists we should see a virile, optimistic throng of rosy-cheeked people everywhere.

An inside bath is had by drinking, each morning before breakfast, a glass of red hot water with a teaspoonful of limestone phosphate in it to wash from the stomach, liver, kidneys and ten yards of bowels the previous day's indigestible waste, sour fermentations and poisons, thus cleansing, sweetening and freshening the entire alimentary canal before putting more food into the stomach.

Those subject to sick headaches, biliousness, musty breath, rheumatism, colds and particularly those who have a pallid sallow complexion and who are consulted very often, are urged to obtain a quarter pound of limestone phosphate at the drug store which will cost but a trifle but is sufficient to demonstrate the quick and remarkable change in both health and appearance resulting from the practice internal sanitation. We must remember that inside cleanliness is more important than outside, because the skin does not absorb impurities to contaminate the blood while the pores of the thirty feet of bowels do.
