This snapshot shows a French observer in a captive balloon directing the artillery fire from French guns. "Captive" balloon in this case means that it is held in position by ropes and wires leading to the ground. The balloonist watches the shots and instantly tells the man at the other end of the phone the results and gives him range corrections if necessary. It's a danger-hunting job for of course the observer is right out in plain view of the enemy and a constant target for snipers.

The general living room, finished in gray, is furnished in Colonial style with mahogany finished safe-legged table, old-fashioned grandfather clock, spinet and other articles. Mrs. Gerlinger is responsible for the selection of all the furniture.

are chilly a grain flag for a short time in one of two rooms will make the home comfortable.

Every home-builder by endeavoring to save coal in the ways suggested can render his country valuable service, and he will not be doing his full duty toward his country unless he renders such service as he can. In addition, he should remember that besides helping his country he will help to shorten the misery and the horror of the great war.

Hot Water Each Morning Puts Roses in Your Cheeks

To look one's best and feel one's best to enjoy an inside bath, each morning a flush from the system the previous night's waste formations and poisons being borne off is absorbed into the blood. Just as usual, when it burns, cavities behind a certain amount of insoluble material in the form of scales, so the food and drink taken each day leave in the alimentary organs a certain amount of indigestible material, which if not eliminated, forms toxins and poisons which are then sucked into the blood through the very ducts which are intended to cook in only nourishment to assist in the body.

If you want to see the glow of healthy bloom in your cheeks, to see your skin clear and clean, you are told to drink every morning upon arising, a glass of hot water with a teaspoonful of limestone phosphate in it, which is a harmless means of washing the waste material and toxins from the stomach, liver, kidneys and bowels, thus cleansing, sweetening and purifying the entire alimentary tract, before putting more food into the stomach.

Girls and women with sallow skins, liver spots, pimples or pallid complexions also those who wake up with a bitter tongue, bad taste, nasty breath, others who are bothered with headaches, indigestion, and stomach or constipation should begin this phosphate hot water drinking and are assured of very prompt results in one or two weeks.

A quarter pound of Limestone phosphate costs very little at the drug store but is sufficient to demonstrate that just as soap and hot water cleanses, purifies and refreshes the skin on the outside, so hot water and Limestone phosphate act on the inside organs. We must always consider that internal sanitation is vastly more important than outside cleanliness, because the skin pores do not absorb impurities into the blood, while the bowel pores do.

Women who desire to enhance the beauty of their complexion should find this for a week and notice results.
