Air Raid on New York Possible. NEW YORK June 3-The ence of submarines off the caused speculation regarding possible attack on New York. The possibility of a submarine penetrating nets and other defenses in the lower harbor was immediately discounted. Auth-orities, however, considered an air raid possible with airships launched from the submarines and experts on naval matters admit such a rold practical.

So accepted is the theory, that anti-alreraft gons long have been post-ed about New York and its environs, Should the Hims attempt to bomb New York it would be an attempt on American morale rather than for mil-Hary reasons.
