THE HOSIERY PROBLEM

Is becoming more acute and serious each day. The government having taken over almost the entire output of all knitting machines in the country. Hosiery and underwear manufacturers are simply "snowed" under with orders from the retail trade, and with no reasonable means at present to cope with the demand. Naturally the old law of "supply and demand" comes in and merchandise becomes higher. Having the advantage of an enormous buying capacity for our 197 stores we can offer you hosiery at lower prices than other stores, but just how long we will be able to secure enough merchandise for our trade we don't know. Take advantage of this opportunity now.
