SAGE TEA KEEPS YOUR HAIR DARK

When Mixed With Sulphur It Brings Back Its Beautiful Luster at Once.

Gray Hair, however handsome, denotes advancing age. We all know the advantages of youthful appearance. Your hair is your charm. It mars the face. When it fades, turns gray and looks streaked, just a few applications of Sage Tea and Sulphur Compound, which is merely the old-time recipe improved by the addition of other ingredients. Thousands of folks recommend this ready-to-use preparation, because it darkens the hair beautifully, keeps it in good condition, tells as it darkens so naturally and evenly. You moisten a sponge or soft brush with it, drawing this through the hair, taking one small strand at a time. By morning the gray hair disappears; after another application or two its natural color is restored and it becomes thick, glossy and lustrous, and you appear years younger.

Wash's Sage and Sulphur Compound is a delightful toilet requisite. It is not intended for the cure, mitigation or prevention of disease.

PLANT IN THE DALLIES EMPLOYS MANY WOMEN

Sawing Machines in Box Shook Plant Are Manured by Weaker Sex.

THE DALLIES, Ore., Aug. 17.—With 25 per cent of the employees women, doing labor which is ordinarily done by men a new factory has been started in The Dallis by the Manchester Box & Lumber company, near the O. W. R. & N. shops. The plant employs 40 people. Most of the women work sawing machines.

The factory produces box shooks and about 40,000 feet of lumber will be sawed daily. The plant is steam operated and the boilers are in a separate concrete building. It also has a large blower room containing waste shavings and sawdust. The fuel needed in the boiler room is supplied by the waste taken from the saws and planers by the exhausters.

The present equipment of the factory consists of planers, a rip saw, three cutoff saws, an automatic twin resaw, an automatically fed horizontal machine, a vertical resaw and other auxiliary machinery such as filing machines and tying machinery.

The factory was started by a group of men in the lumber business, who have been successful in the past.

U.S. MARINES SAVED PARIS IS DECLARED

Eye Witness Account of Chateau-Thierry Fight Made Public by Navy.

OFFICERS BELIEVE STAND RESPONSIBLE

Deliberate Fire With Adjusted Range Beyond French Experience.

WASHINGTON, Aug. 19.—A graphic eye-witness account of the fighting near Chateau-Thierry, in which American divisions, including the marine brigade, took part early in June, is made public by the navy department. It is in the form of a long letter from an officer of the marines to Major General Barnett, commanding the corps, and the story told is of peculiar significance as, in the opinion of many officers here, it was the stand of the Americans alone, this line which saved Paris. The writer is not disclosed.

The Americans were rushed to the line in motor trucks to support the hard-pressed French and on June 1 the marine brigade deployed on a support position, the battalion commanded by Major Thomas Holcomb hurrying into line as the men climbed off the trucks. The Germans were coming on and on June 2 the French dropped back, passing through the American lines.

"We had installed ourselves in a house in La Vole Chatelet, a little village between Chateau-Thierry and La Boquerie," the writer says. "From one side we had observation of the north side we had observation of the north and when the Germans attacked at 5 p. m. we had a box-seat."

"They were driving at Hill 165 from the north and northeast and they came out on a wonderfully clear day. In two columns across a wheat field. We could see the very thin order until two-thirds of the column was wiped, were in view."

"The rifle and machine gun fire were incessant and overhead shrapnel was bursting. Then the shrapnel came on the target, at each shot. Seemed suicide."

"The white patches would roll away and we could see that some of the columns were still there, slowed up, and it seemed perfect suicide for them to try. You couldn't begrudge a tribute to their pluck, at that."

"Then, under that deadly fire, and a barrage of rifle and machine gun fire, the Boche stopped. It was too much for any men. They burrowed in or broke to the cover of the woods and you could follow them by the ripples of the green white as they raced for cover."

The writer declares the rifle fire of the marines amazed the French who saw it.

"That men should fire deliberately and use their sights and adjust their range," he says, "was beyond their experience. It must have had a telling effect on the morale of the Boche."

For it was something they had not counted on. As a matter of fact, after pushing back the weakened French and then running up against a kite-swall defense they were literally "up in the air" and more than stopped. We found that out later.

from prisoners, for the Germans never knew we were in the front line when they made that attack. They were absolutely mystified at the manner in which the defense stiffened up until they found that our troops were in line."

Fighting Followed. The letter tells in detail of the days of fighting that followed. It describes a daylight charge against a machine gun post and of scouting raids up to June 6, when the whole brigade swung forward, to straighten out the line. This action resulted in the capture of Belleau wood.

Major Sibley's battalion of the sixth marine regiment led the way here with Holcomb in support. The woods were alive with enemy machine guns. That night word came back that Robinson had taken Bourchenes, breaking through a heavy machine gun barrage to enter the town. Robinson, fighting with an automatic in each hand, was hit three times before he would allow himself to be taken to the rear.

Speaking of individual acts of bravery, the writer says Duncan, a company commander, "before he was

nel was bursting. Then the shrapnel came on the target, at each shot. Seemed suicide."
