LALLEY-LIGHT

THE BALL-BEARING ELECTRIC LIGHT PLANT

Lalley-Light furnishes two sources of light and power in the one plant.

The machine itself is one; the storage battery is the other. Light used direct from the generator is as steady and strong and brilliant as from the battery.

This is an advantage not usually found.

It is due to the fact that the patented Lalley-Light engine is especially designed and built to drive an electric generator.

It is worth a great deal to the man who must have light and power that are wholly reliable.

We will demonstrate Lalley-Light, free. Call for the book of owners' testimonials.
