ounting it is claimed, to 1500 men, coupled with the extraordinary demands for the output, have made it impossible for the central heating plant here to lay in any reserve whatever of coal against winter contingencies, on which all the business part of the city depends.

TACOMA, Wash., Oct. 12.—Whether the United States shipping board will take over the Foundation Company's Tacoma yard or will close it entirely is problematical. FOOD PROFITTERS GERMAN PLAGUE

NEW YORK, Oct. 12.—Adulteration of food and profiteering from the sale of substitutes for food have become a plague in Germany. This statement is made by the chemical institute of Leipzig and is published in the Berlin Tageblatt.

Dr. Roehrig, writing the report for the institute, said the mineralization of foodstuffs was increasing. Gypsum and chalk are used to adulterate flour, baking powder and spices. Sawdust, strawdust and nutshell dust are sold at incredible prices as food adulterants. Carpenter's glue is used in the manufacture of pudding powder, and flour sweepings in the baking of bread. Foreign substitutes found in the bread included flax fabrics, cotton, wood pulp, straw and sand.

The bread of one bakery contained 13 per cent of copper. In pepper was found 84 per cent of ashes and 2 per cent of sand.

Some of the food profiteers are being sent to prison as well as being fined. In one case reported by the Tageblatt a storekeeper in Dresden was sentenced to one year in prison and to pay a fine of 192,289 marks.

Cow Precious Mascot.
WITH THE AMERICAN ARMY IN FRANCE, Aug. 30.—(By mail.)—A cow is a practical sort of mascot, but not very handy on a forced march. One machine-gun outfit is authority for this statement.

When the machine gunners were up on the Vesle river they captured a cow one day while pursuing the Germans. They confiscated the cow, being unable to locate the rightful French owner.

There was a debate as to whether Bossie's milk would be of more value than her meat, and the "milk" won. So Bossie was stored in some ruins, and fed when feeding was not too risky.

Then came the order to go back—the outfit was relieved after a strenuous week's fighting. Bossie was a little slow for that marching and couldn't go in a truck, as the outfit did. Finally a couple of ardent milk fans offered to walk back with Bossie to the rest positions.

It was a long walk. They had covered 50 miles when the United Press car just passed them. But Bossie did her best in the way of milk, on the way, and the machinegun boys hope to keep her, though all the odds of war are against them.

Banker Raises Bean Crop.
ROSEBURG, Or., Oct. 12.—J. M. Thorne, cashier of the Umpqua Valley Bank, has just returned from his farm in Looking Glass Valley, where he has been harvesting his 100-acre crop of beans. Notwithstanding the extreme dry spring and summer it is reported that his clean crop is 50,000 pounds of beans, a profitable yield at present prices.

The beans were pulled with a machine which gathers two rows at a time. Mr. Thorne owns his own bean thresher and when it came time to thresh he mounted the machine himself and for ten afterwards fed it and proved to the other men on the job that there was nothing too hard for a banker to do if he had to do it.
