LITTLE RAILWAYS SPEED UP BATTLES

TOY LIKE TRAINS SPEED THRU FIELDS

Switches, Sidings and Small Toots Keep Roads Clear.

BY FRANK J. TAYLOR
(United Press Staff Correspondent)
WITH THE AMERICAN ARMY IN FRANCE, Oct. 2.—(By Mail)—All up and down the American front there is a network of narrow-gauged railways, running to every point along the front, and connecting the fighters with their bases in the rear.

The Americans have developed railway building along the front to a high degree of efficiency. They can lay a track through a wood or across a field almost no time, and soon little engines, especially built for the front, have been chugging along dragging strings of cars loaded with shells, food, and other things the doughboys need.

Look Like Toys.
The little trains look like toys, they are so small, but do the work of full grown railway outfits. They carry enormous loads and wind along through fields, woods, roads, and villages with great speed. There isn't any block system to keep trains from meeting along the way, but somehow genius of these American railway engineers keeps lots of trains going all the time with seldom any congestion.

Switches and sidings help keep roads clear. They are frequent at the head of the little American locomotives. The tool is modeled after that of a full grown Baldwin, and is a sound which delights the doughboys. Americans never have liked the frantic squeak they put on French locomotives instead of a whistle.

Tracks of this type are necessary to connect the rail heads of big wide gauged railroads with the front. Supplies come surprisingly near the front on the big railways. From their stoppages have carried stuff to fighting range.

Ordinary roads often are crowded in rainy weather and hard to make speed over. The little narrow gauge trains ran all the time to relieve traffic, doing most of the work at night. They are quickly repaired when blown up, and are extended in few hours.

Following the recent advance of the doughboys across No Man's Land, the railway engineers soon had their tracks laid and puffing little engines dragged chains of cars loaded with necessary supplies over to the infantry and artillery.

Once across No Man's Land the engineers were able to hook onto railroads left by the fleeing Germans and the Americans had a fairly extensive temporary system already laid out for them. They used captured German engines and cars, too, temporarily. But the hoche rolling stock did not compare to the cars marked "U. S. A."

OWL HAS NOTHING ON PHEASANT IN BEING WISE BIRD

Illustrating that the owl, the bird noted for his wisdom, has nothing on a China Pheasant, George Tonkin, district game warden for Umatilla county, tells of a trip a few days ago, when he was the guest of the game warden of Walla Walla county.

England Finds Women Police Very Satisfactory

LONDON, Oct. 18.—(By mail)—Now that many American cities have their own woman police it may be interesting to learn how England's women police have developed into a real force for the maintenance of order and public morality.

SEND CHRISTMAS TO SOLDIERS NOW

WASHINGTON, Nov. 14.—Two hundred cars laden with 100,000 mail sacks of holiday cheer for American soldiers in France soon will speed westward toward New York to be shipped overseas in time for Christmas.

Comfortable for you

The big things you demand in a shoe are built into the BUCKHECHT Army Shoe. Its comfort comes from the Munson Last as specified by the U. S. Army. Business men, farmers, carmen, miners, ranchers, sportsmen, hikers, outdoor workers—all are wearing the BUCKHECHT Army Shoe. Result? Foot troubles are no longer known to them. And—what's more—their shoe bills have been satisfactorily reduced.

Manufactured by BUCKINGHAM & HECHT, SAN FRANCISCO

REG. U. S. PAT. OFF.
ARMY SHOE

If your dealer does not carry this Buckhecht Shoe, order from us direct. A satisfactory fit or your money back.

Manufactured by Buckingham & Hecht, San Francisco. Sold in Pendleton by BOND BROS. \$7.00 to \$8.00

should help the drive against him have been sent to France. Many entertainers are likely to be called on for service in the army as canteen experts.

UNCLE SAM FILMING MOVIES FOR FARMERS

(By United Press.)
WASHINGTON, Nov. 13.—Again the camera has been called upon to help win the war.

This time, they are to be used to stimulate food production. The department of agriculture has announced that 1,000 feet of film a week, designed to increase the size of corn, will be ground out at the big motion picture laboratory connected with the department.

There is to be a wide latitude in subjects chosen, some of which should be of interest to farmers in every section of the country.

Farmers will be shown how to fight forest fires, how to control hog cholera, the best way to exterminate the prairie dog, how to make cottage cheese, approved methods of fumigating California fruit, up-to-date methods of drying vegetables at home and a score of other things of interest to the agriculturist.

OFFICERS' TRAINING CAMP IS CANCELLED

CAMP FREMONT, Cal., Nov. 13. The infantry officers' training camp, which was to have opened here December 1, was cancelled by orders received here today from the war department. Twenty thousand candidates had been expected at the camp. It was stated today that those who have already enlisted will be discharged upon their arrival.

HUNGARIAN STATESMAN SHOT DOWN BY SOLDIER

MORE than 600 of these hot head clearing houses already have been established throughout the Hungarian and a large extension of the system is planned. The community kitchen has been eminently successful. More than 2,000,000 portions are being dispensed by them daily.

Housewives take their food, have it cooked, and call for it in time for dinner. A small fee is charged for the cooking.

A restaurant usually is operated in connection with the kitchen.

CORRESPONDENCE SCHOOL OF COOTIE-KILLING OPENS

(By United Press.)
WASHINGTON, Nov. 14.—Come into the cootie class!

The class holds forth in the bureau of entomology in the big building of the department of agriculture. There is also a course by mail for scientists unable to get the first-hand information in Washington.

American entomologists all over the country are enrolled in the class. They stand ready to answer any call the war department may issue, whether to fight the cootie overseas or at home.

Already many hitherto undiscussed facts have been discovered about the cootie, and valuable hints which

COUNT STEPHEN TISZA

ENORMOUS RESERVES OF ESSENTIALS CARRIED BY QUARTERMASTER

1,000 Bed Hospital Has 10,600 Complete Outfits, 10,000 in Reserve.

WITH THE AMERICAN FORCES IN FRANCE, Nov. 12.—The supply of clothing for American soldiers in France is maintained here on a prodigious scale, for soldier service is hard on clothes and shoes, and besides the million outfits always on hand there is the continual renewal and upkeep. This upkeep for a single month for the American force now in France is 200,000 service coats, 400,000 pairs of trousers, 200,000 over-alls caps, 200,000 pairs of puttees, 1,200,000 pairs of socks, and 240,000 pairs of field shoes, or about 2,000,000 articles monthly of these six essentials, with a long list of lesser articles.

It is estimated that about 4 pairs of shoes per man are required for a year, which for an army of a million men means 4,000,000 pairs of army shoes.

In underclothes, wool and cotton, light and heavy are carried, but the soldiers seem to prefer wool even for summer time.

55,000 Stoves.

Looking ahead to the winter, it is calculated that 55,000 stoves will be needed to keep the troops warm through four or five months of cold weather, and some 20,000 wood cutters will be required to produce the wood for heating. There are already 15,000 foresters at work, but as their product is being used largely for buildings, more will be put on for the wood-cutting and the total enlisted foresters may reach 45,000.

Wood is the chief dependence for warming as the 125,000 tons of coal brought in from England every month is used chiefly by the railroads and constructive works.

French forests are proving the main source of supply, but Spain and Switzerland are also furnishing large supplies of lumber.

15 Days' Reserves.

Every day a table is made up to show the exact state of all the supplies required by this big army. This table is a sort of barometer, which gives warning of any shortage. But there is no shortage and on the contrary all the articles considerably overran the provision for three months' stock always ahead. Flour, for instance, is on hand much beyond the three months' limit, and so are the beans and tobacco.

It was known daily, too, whether the advance zone has its required minimum of 15 days of reserve stores, the intermediate 30 days, and the base ports 45 days—all in three months of reserve supplies constantly on hand and constantly moving forward as they come from America on the way to the fighting front.

OFFICERS CENSURED IN HUGHES AIRCRAFT REPORT

Grocer Too Busy to See Food Inspector, Red Cross Gets \$50

Grocer Too Busy to See Food Inspector, Red Cross Gets \$50

WASHINGTON, Nov. 13.—The Red cross has gained \$50 because a local grocer was "too busy" to talk to a food inspector.

THREE GIRLS DECIDE WHAT SOLDIERS AT O. A. C. HAVE TO EAT

CORVALLIS, Nov. 12.—More than 2000 of the local O. A. C. men are being fed under the management of three home economics girls. One girl is at Cuthbert's hall and one at Walden hall (formerly girls' dormitories) where now 50 O. A. C. men are housed, and the other at the mess hall in the armory. The work is hard but interesting. The girls do not cook or serve but act as overseers, measure out supplies and make out menus.

PARIS HEADQUARTERS FOR NEW GOVERNMENTS

WASHINGTON, Nov. 14.—The new central government of the United States of Serbia, Croats and Slavs and Jugoslavians will establish headquarters in Paris, according to a dispatch to the French high commission.

THEY NOT ONLY... (Small text at the bottom of the page)
