The Famous Nash Quad

Most any truck gives the owner more efficiency than the old style team transportation, but the famous **NASH QUAD TRUCK** Gives the owner at least 50 per cent more service than many rear wheel driven trucks selling at nearly the same price.

If the NASH QUAD is not the very best truck of its class on the market, the U. S. Government would not have shipped over 20,000 of them to France, several times as many as all other makes of four wheel drive trucks combined.

A NASH QUAD TRUCK will serve you just as efficiently as it served the Allies in the great war. The Government bought it in huge quantities because it was the most capable and dependable truck available. You should buy it for the same reason.

It would be a good plan to place your order now for spring delivery, as we have only one in stock at this time.
