Peace and Pigs Share England's Thoughts

LONDON, Nov. 6.—(By mail.)—Two topics are uppermost in the nation's mind today—peace and pigs. The great pig question is being argued north, south, east and west. The government sent out a notice that

all pigowners must kill their pigs before Christmas owing to lack of suitable food; whereupon the pig growler, with a tear in his eye and a sob in his heart, rose and asked the nation why hadn't he been consulted. In a pathetic speech he showed how the government had taken this action right over his head, and as all pigs were to be killed before Christmas his position as pig growler was ridiculous and therefore untenable. Wherefore he resigned—and the squealing of hundreds of little pigs who thought they'd rather be controlled than killed, but the public doesn't mean to let this pig question die out so easily. Pigs must and shall be reared, so pig-lovers are organizing house to house collections of savings in order to keep bright the prospect of pork. If they are able to keep the pigs going this way the government might be induced to rescind the death sentence.

Relatives of Despain stated today that they will ask the tenant to get out of the house as they do not wish him to be the occupant of the place when Joe Despain returns.

NEW PROPAGANDA FINDINGS AIRED

WASHINGTON, Dec. 9.—German propaganda in the United States raised nearly \$28,000,000 for conducting their work here, Bruce Blakesli told the senate investigating committee today.
Blakesli said \$12,500,000 were raised through loans from New York banks and \$8,000,000 from German banks. Nearly \$2,000,000 were spent in the Bolo Pasha affair, \$1,700,000 in purchasing the New York Mail and four or five hundred thousand in propaganda among the Jews and hundreds of thousands among the Irish.

Food Administration Suggests Pledge for Women of America

Herbert Hoover has suggested a pledge for the women of America in observance of conservation week. It is issued with the following message: "The food supplies of the world have been steadily lessening. It is the impact of this shortage which has knocked at every door in the United States.

We hold it in our power and ours alone, to keep the wolf from the door of the world. This duty is silder than war—it is as wide as our humanity."

The Pledge . . .
We pledge to our country our best effort to prevent waste and the selfish use of our food reserves. We pledge our loyal cooperation in carrying out the conservation measures suggested by the government.

And if economy sometimes grows irksome or if this service works unsettling change in our accustomed manner of living, we will think of those who have offered their lives for their country and those whose homes have been devastated. We will be glad that we, too, can serve in satisfying their hunger, in renewing their courage, and in re-establishing their homes.

REGULATION LAW UPHOLD.

WASHINGTON, Dec. 9.—The supreme court upheld the Kansas law licensing regulating grain and produce commissionmen. The law was passed primarily to control produce commission men who, it is claimed, were dealing unfairly with farmers. The supreme court decided the holding companies need not pay the corporation tax passed by congress, 1913.

They Got Their Medicine—Late.

LONDON, Nov. 6.—(By mail.)—Some Londoners have found raid-dodging an expensive game.
Mr. and Mrs. Kaleski Lewis went to Brighton in July, 1917, to escape air-raids. In April this year thieves got into their London home, and when the police searched the place they found the attic floors covered with flour and sugar on which thousands of mice were feeding.
In addition to 448 pounds of flour and 324 pounds of sugar there was a very large quantity of tea and jam, and the mice spoiled the contents.
This is what wartime nerves cost Mr. and Mrs. Lewis. The burglars got their silver, the mice got their food, and the magistrate got \$1000 of their good money.

MAMMA! DON'T YOU SEE YOUR CHILD IS SICK, CONSTIPATED.

LOOK AT TONGUE! MOVE POISONS FROM LIVER AND BOWELS AT ONCE!

BY WEBB MILLER (United Press Staff Correspondent.)
WITH THE AMERICANS IN PRUSSIA, Dec. 9.—American troops are in Coblenz. A small detachment, at the request of German authorities, went ahead of the main section of the third army for the immediate occupation of the important Rhine city. It traveled on a special train, arriving at Coblenz at noon Sunday. Permanent occupation of the center of the American bridgehead resulted from a written request of the headquarters military commander, who asked the American command to send troops immediately after the signature of German peace. No disorder is reported, but German officials declared that owing to American conditions, they wished to take no chances. The arrival of the Americans on the Rhine is thus four days ahead of schedule. The remainder of the third army will arrive as planned.

King Saves Coal, Too.
LONDON, Nov. 19.—(By mail.)—The king is busy cutting down his coal ration.
With the queen and the court he has returned to London and to a fireless palace.
A plan to economize fuel is in operation in all the royal palaces. In Buckingham palace, Windsor Castle, and Sandringham the grates have been bricked up and the number of fires greatly reduced.
By royal command the household fires have not yet been going for the winter. Lighted of passages, corridors, and ante-rooms has been cut down by more than half, and in the king's private apartments a similar practice has been followed.
