BUILD NOW

REPAIR AND CLEAN UP JOBS
OCCUPY STAGE; BUILDING NOW
CONFINED TO EARLY CONTRACTS

The improvements to the county poor farm, which have been under way for the past six months, will be completed in a few days, according to L. G. McAtee, painter and decorator, who has had a force of men at work. All of the eight buildings on the place have been painted on the exterior and the dwellings have been completely refinished inside. Walls have been calcimined, floors and woodwork painted and everything put in ship shape. The county farm is now in excellent shape for several years of use.

Mrs. Oliver Lets Contract

Painting, calcimining and papering in the new home being built for Mrs. C. A. Oliver will be done by L. J. McAtee, the contract having just been let. Work on the exterior was begun Wednesday. The interior will be finished in old ivory enamel and paper on the first floor, the upper story being of calcimine within. The H. F. Trombley farm home is also being painted by Mr. McAtee's men.

Miller Makes Suggestion

Although people need not worry about their pipes freezing for several months, C. P. Miller, the plumber, says that suggestions are always in order. He advises people to remember that when coils in their stores are in danger of freezing in cold weather a warmed rock placed in the stove at night will prevent trouble.

Offices to Be Done Soon

About one more week will see the new offices of the Pacific Grain Co. on Main street ready for occupancy. Murphy Bros., who are doing the painting and decorating, are due to have their part finished late next

week and J. L. Vaughan will have the wiring and lighting fixtures installed in a few days. Dunham, Brownlow & Payne are doing the carpenter work.

Phelps Gets Bank Job

D. D. Phelps announced today that the contract for remodeling the plumbing and heating system in the new offices of the American National Bank building had been awarded to him and he will commence work on the improvements as soon as the general work will permit. There will be 15 office rooms in the remodeled building.

Vaughan to Wire Academy

The new St. Joseph's academy building will be wired and fitted with electrical appliances by J. L. Vaughan, the local contractor. Mr. Vaughan has just completed installing the electrical work in a new plant for the Standard Oil Co., at Helix.

Building Still Dull

Another week has passed without any permits being taken out for new work. During the week four small permits for repairs were issued. It has been more than a month since a permit was issued for a new home or building and at present there is nothing new being started. Carpenters and mills are busy however, supplying materials for the many buildings contracted for earlier in the season and now under way.

The weeks permits are:

Mary Maynard	10
Margaret Joerger	100
L. J. McAtee	50
Anna Marsh	100
Total	260
Previously reported	\$252,790.
