### Japan Open to New Ideas.

TOKYO, Aug. 20.—Japan is all in readiness to welcome the new ideals of the world developed by the war. Japanese opposition to introduction of the ideas that changed world conditions have created would take the country back into feudal days, according to M. Nakabashi, minister of education.

"The propagation of democratic ideals which the war has brought in its train has given an impetus to the rise of new ideas in Japan, where freedom of thought has long been subject to regulations. This is a satisfactory sign of the times."

"It must be remembered, however, that bad as well as good ideas are apt to find their way here. As the constitutional ideas of the people are still undeveloped, there is danger of their becoming contaminated with radical ideas."

"In my opinion the so-called new ideas are prevalent only in a restricted section of society and are not so dangerous as some fear. If influx of all foreign ideas is to be prohibited, owing to their possible baneful nature, that will mean reversion to the feudal days when Japan was isolated from foreign intercourse and the import of all foreign ideas was zealously guarded."

**FRANKLIN CAR**  
The Logical Choice of Busy People

It is quite noticeable that the Franklin is becoming more and more the favorite of the man or woman who does things.

The reason is simple.

In this car they find an efficiency, a riding comfort, an ease of handling, and a grace of design that are important added features to its remarkable economy—a steady day-by-day delivery of

**20 miles to the gallon of gasoline—instead of the usual 10.**

**10,000 miles to the set of tires—instead of the usual 5,000.**

Moreover, men and women of affairs must have a car that is instantly ready for service, and the Franklin Direct Air Cooling System eliminates the possibility of its being frozen into uselessness. The Franklin needn't be coddled—it is always ready to run—whatever the weather.

In crowded city streets or on rough country roads, the Franklin goes on its way lightly, surely, easily—without strain or pounding on its passengers.

A demonstration will prove what we say.
