PROPOSAL OF GOMPERS FOR ARBITRATION OF STEEL STRIKE BLOCKS CENTRAL COMMITTEE

Declaring for Open Shop Representatives of Capital Propose Code of Industrial Relations; Limit Dealings.

PLAN RECOGNIZES ONLY EMPLOYEES OR DELEGATES

Recess of Hour Taken to Permit Central Committee of 15 to Decide Report on Labor's Arbitration Proposal.

WASHINGTON, Oct. 10.—The industrial conference voted a recess until Tuesday morning to give the central committee time to study the report on the labor group's proposal that the conference name a board of six to arbitrate the steel strike.

WASHINGTON, Oct. 10.—Declaring for open shop, the delegates representing capital today proposed a code of industrial relations to the national industrial conference. "No employer should be required to deal with men or groups of men who are not his employees, or chosen by men among them," says the report.

A recess of an hour was taken by the conference so that the central committee of 15 could decide what report to make on the labor group's proposal for arbitration of the steel strike. The committee is deadlocked over its report.

Chairman Chadbourne wanted adjournment until Tuesday but President Gompers, of the Federation of Labor, blocked it. The employers group proposals are divided into 12 clauses, all of which in form are the enunciation of general principles. One declares "there should be no interference with open shop, that is, a shop in which membership or non-membership in any association is not made a condition of employment."

side under weight. This in most cases due to improper diet, she thinks, as some children show by answers to questions that they are not eating the proper food. One Echo boy, when asked what he had for lunch, replied: "Oh, I had a banana and a sack of candy and a package of gum." Besides testing the weight, Miss Flanagan ascertains the height of the children, the condition of their hearing, their teeth, their tonsils and their ears. She plans at the conclusion of her work in the schools to organize her work in a Health Crusade and will interest the parents in this also. The children do not object to the tests and all show keen interest in their scores. Miss Flanagan explained today that the tests were simply in the nature of rudimentary examinations and when a child is found to be defective in any way, the parent is notified so that the conditions may be rectified.

Gale met his Waterloo when he parked over a white line. The alert officer took his number and invited him to appear in police court. A Berlin dispatch stated that Germans had occupied two villages six and nine miles, respectively, south of Riga.

The president laughs and jests with physicians and always has a sally ready when they are most serious. This, they say, aids materially in his recovery. LOCAL WRESTLER PUTS VISITOR OUT OF MATCH

Two straight falls, the first in 17 minutes and the second in about 20 seconds, put Rex Walker, Sacramento grappler, out of the running in his match with Loyd Ireland, "Kid Irish," last night in the Oregon theater. The local wrestler had the best of the argument all through, although he was outweighed about 8 pounds and of smaller stature all around.

A fair sized crowd attended the match and was well satisfied with the exhibition put up by Ireland. The Sacramento man did not have the science nor the experience of the winner, however, and it was soon evident that the former army instructor would have the best of it.

SUNFLOWERS' USE FOR SILAGE TO BE TESTED

The use of sunflowers, for silage instead of the use of corn will be tested at the A. E. Bixby ranch near Umatilla to determine if the feeding value of sunflowers, which yields in most cases three times as many tons to the acre than corn, is the same as the feeding value of corn silage. Mr. Bixby planted four acres of corn and two of sunflowers and the yield from each crop totalled 25 tons. A load of corn and a load of sunflowers will be alternated in filling the silo so that the effect of sunflower silage as feed and that corn silage may be shown.

Fred Bennion, county agent, says that in every case so far the feeding value of the two kinds of silage has proved to be the same. The use of the varieties in this county will be in the nature of a practical demonstration and Mr. Bixby will keep a record on the milkings from the cows to show results. Farmers will visit the ranch during the feedings.
