Magnolia Lodge, Pendleton Chapter Degree of Honor presented Mrs. Margaret Becker with a traveler's writing portfolio during Mrs. Becker's recent visit to Pendleton. She is a past state president and was here for the Degree of Honor district convention. The gift was a token of the esteem in which Mrs. Becker is held by the chapter. Mrs. Leota Brown, who acted as captain, was presented with a cut glass olive dish and olive fork by the members of the degree team of the Magnolia chapter.

Pheasants to be plentiful. If things go right, there should be 24,000 new China pheasants ready for the sportsmen next year, calculates Frank Warren, member of the state game and fish commission, who left for Lane county yesterday, to look over the pheasant farm. "We will hold over 4000 birds," said Commissioner Warren, "and each pair should average 10 birds next year after they are released and this will give 20,000 birds, and counting the 4000 turned loose, this makes 24,000. It looks to me as though the logical thing to do is to hold the birds over until spring. Releasing birds in the fall has not been entirely satisfactory. The birds have to face the rains and cold and many are lost before spring comes. By sheltering the birds until spring and then releasing them they have several months before them in which to propagate, and the climatic conditions will be favorable. The Chinas have never recovered from our silver thaw. When a bird gets under a tree and his long tail feathers touch the ground he is anchored there by ice until he dies."
