

EAST OREGONIAN SPECIAL NEWS OF UMATILLA CO.

VALLEY ABOUT UKIAH HAS FIRST SNOWFALL

(East Oregonian Special) UKIAH, Oct. 21.—Snow fell Thursday night, on the foothills almost down to the valley. The weather has turned cold and it begins to feel like winter is near.

OVER-ACIDITY of the stomach has upset many a night's rest. If your stomach is acid-disturbed, dissolve two or three KI-MOIDS

in the tongue before eating and enjoy refreshing sleep. The purity and goodness of KI-MOIDS is guaranteed by SCOTT'S BROTHERS, MAKERS OF SCOTT'S EMULSION

TROCO As Sweet and Delicate As Its Ingredients

Dainty pats of Troco, sweet and delicate in flavor, enhance the enjoyment of all other foods you serve. The use of Troco in cooking—for making cakes and for seasoning meats and vegetables—means that these particular dishes will be especially good.

All because Troco itself is so perfect in flavor and quality. You may pay more but you can't buy a more delicate, delicious product.

Made from the White Meat of Coconuts

Troco is made from the dainty nut fat extracted from the white meat of coconuts, the most valuable of all Tropic foods. This is churned by a special process with pasteurized milk, the temperate climate's food standby. We churn and ship every day, on ice, to insure freshness.

If your dealer will order often and keep his stock in the ice box, Troco will reach you in perfect condition—a supreme table delicacy.

Your grocer has Troco or can get it for you. If you cannot secure it in perfect condition send his name to the Troco Nut Butter Company, Chicago.

We are obliged to label Troco as "oleomargarine" because of old laws passed before it was invented. But it contains no animal oils—just pure vegetable fats and more delectable milk.

USES COMMON YELLOW MUSTARD FOR CHEST COLDS AND SORE THROAT

Old Fashioned Simple Home Remedy Much Used by Doctors and Nurses for Inflammation, Congestion, Aches, Pains and Swellings.

Mustard, real yellow mustard, the kind you use at home, is being used more than ever to banish distress and misery and free mankind from agony and suffering. Not very long ago people used to make yellow mustard into a paste, spread it on a cloth and apply it to that part of the body where pain or inflammation was present. It rarely did the work it is expected to do, but it was messy and bothersome and often blistered the skin. People still use yellow mustard when they get a cold in the chest or have pleurisy, lumbago or rheumatic pains and swellings. But nowadays they buy this yellow mustard in condensed form all ready for use. It is something like 20 cents a box and it is much better, cheaper and cleaner than mustard plasters.

America and one box will do the work of 50 mustard plasters and it cannot blister the tenderest skin. Begy's Mustard is the original mustard preparation used to take the place of blistering mustard plasters and is known among druggists as the quickest painkiller on earth. It will pay you to keep a box of Begy's Mustard in the house, for it is used for so many ailments that you will need it often. Just rub it on, that's all you have to do, and headache, backache, earache and toothache will disappear, almost instantly. Don't fail to use it for neuritis, neuralgia, sciatica, lumbago, gout and rheumatic pains and swellings. You will quickly find that there is nothing so good for sprains and strains, sore muscles, stiff neck and cramps in leg. Heat causes pain and Begy's Mustard made of yellow mustard with other helpful ingredients added, contains more concentrated, non-blistering heat than can be found in any box the same size. Just try a 10-cent box—you'll praise it to the skies as millions are doing every day. Always in the yellow box.

GARY UNDER MARTIAL LAW

GARY, Ind.—With martial law proclaimed in Gary as the result of steel strike disturbances, U. S. soldiers are patrolling the streets. Picture shows a riot squad of two in motorcycle and side car which always gets the right-of-way.

FRED BLINN TO BUILD NEW STORE AND HOME

(East Oregonian Special)

HELIX, Oct. 21.—Work has started on the Fred Blinn store by C. A. Lansdowne of the Northwestern Home builder of Pendleton. He is also going to put up Mr. Blinn's residence. The store will be 48x70 with a full basement and plate glass front, while the residence will be a 12x14 bungalow. The estimated cost of the two buildings is \$12,000.

Faye Zerba spent Friday at the L. D. Clark home. A number of Rebekahs attended the convention in Weston Saturday. The Odd Fellows gave a banquet Saturday which was largely attended by Pendleton men. Miss Eva McKinney is spending the end at her home in Weston. Mrs. Sylvia Thomson of Dayton, Wash., was visiting at the L. D. Clark home this week. Mrs. W. S. McLain is visiting her mother in Portland. Prof. Reed, Deloss Robinson, Charles Throck and William Albee went to attend the boy's convention at The Dalles. L. D. Clark, Jr., Elbert Clark, Alice Clark and Faye Zerba were visiting in Dayton last week end.

ROQUEFORT CHEESE

Roquefort cheese is imported from the village of Roquefort, in the department of Aveyron, France. It is made from the milk of goats and sheep and matured in the rocky caves of the Larac cliffs. The production of this cheese is enormous, though the population of the village is about 1000.

Born in 1839 Dr. Caldwell Still in His Office Daily

Wonderful vigor of the founder of Dr. Caldwell's Syrup Pepsin. Millions now use his famous prescription

ALL physicians know that good health depends largely upon proper digestion and elimination, and that most sickness results from these causes. None knows this better than the "family" doctor, the general practitioner.

Dr. W. B. Caldwell of Mendocillo, Illinois, was and is a family doctor. The whole human body, not any small part of it, was his practice. More than half his "calls" were on women, children and babies. They are the ones most often sick. Not their illnesses were usually of a minor nature—colds, fevers, headaches, biliousness—and all of them required first a thorough evacuation. They were continued.

Dr. Caldwell in the course of 40 years' practice, for he was graduated from Rush Medical College back in 1873, had found a good deal of success in such cases with a prescription of his own containing simple laxative herbs with pepsin. In 1892 he decided to use this formula in the manufacture of a medicine to be known as Dr. Caldwell's Syrup Pepsin, and in that year the preparation was first placed on the market. The picture of Dr. Caldwell that appears on the package was taken in that year.

The preparation immediately had as great a success in the drug stores as it previously had in the doctor's private practice. Today the third generation is using it.

Mothers are giving it to their children who were given it by their mothers. Every record of the working day someone somewhere is going into a drug store to buy it, for Dr. Caldwell's Syrup Pepsin is selling at the rate of over 6 million bottles a year.

Its great success is based on merit, on repeated buying, on one satisfied user telling another. There are thousands of homes in this country that are never without a bottle of Syrup Pepsin, and the formulator of that prescription is fortunately living to see its wonderful success.

Women, children and old people are the ones most benefited by Dr. Caldwell's Syrup Pepsin. It differs from physics in that its action is mild and gentle and free from griping. It does not weaken. And while it is promptly effective in the most obstinate case, it is safe for a tiny baby as it contains no narcotics.

Every drug store sells Dr. Caldwell's Syrup Pepsin at 50c and \$1 a bottle, the latter the family size and sufficient to last months. Keep a bottle in your home. Where many live someone is sure to need it quickly.

DR. W. B. CALDWELL TODAY. Born Mendocillo, Mo., March 27, 1839. Began the manufacture of his famous prescription in 1892. In spite of the fact that Dr. Caldwell's Syrup Pepsin is the largest selling liquid laxative in the world, there being over 6 million bottles sold each year, many who need its benefits have not yet used it. If you have not, read your name and address for a free trial bottle to Dr. W. B. Caldwell, 511 Washington St., Mendocillo, Illinois.

Concrete Dam 100 Feet High Warm Springs Irrigation District, Riverside, Or.

Table with 2 columns: Item and Amount. Includes Irrigable area (39,000), Area expected to be irrigated (24,000), Estimated average gross value of crops (12,000), Total authorized and outstanding bonded indebtedness (\$800,000), Estimated market value of land (1,330,000), Estimated average market value of land per acre (46.00), Estimated average gross value of crops per acre (27.59), Average tax levy per acre required for operation and maintenance (2.79), Estimated population (75), and Estimated population including that of cities (4,000).

Dam Warm Springs Irrigation District, Riverside, Or., Now Completed.

History and Development of Warm Springs Irrigation District

The Warm Springs Irrigation District, organized in 1916, is located in Malheur County, Central Eastern Oregon, and is comprised of 29,900 irrigable acres. It is about 500 miles east of Portland, Oregon, 160 miles east of Pendleton, Oregon, and 60 miles west of Boise, Idaho. The population of the District is estimated at 4,000, which includes that of the cities of Vale and Ontario within and adjacent to the District, though excluded therefrom. Vale is the county seat of Malheur County, and the headquarters of the District are located there. Vale and Ontario, which were incorporated in 1889 and 1899, respectively, each have two banks with an aggregate capital of \$335,000 and total resources on January 1, 1919, of \$2,550,956. The 1918 assessment valuation of said two cities is \$1,181,752. Ontario is on the main line of the Oregon Short Line Division of the Union Pacific System from Omaha to Portland, and the entire District is traversed by a 150-mile branch line running from Ontario to Crane in Malheur County.

The \$1,350,000 6% bonds have been sold by the above District to enable it to acquire a reservoir site and to construct a dam to impound about 170,000 acre feet of the flood waters of the Malheur River and also to enlarge and extend the existing canal system.

The construction of the dam six miles from Riverside Station has been completed and it is estimated that the distribution system will be practically complete by December 1, 1919. The storage of 170,000 acre feet of flood waters of the above river

Under the Irrigation District Law of Oregon the bonded indebtedness of these districts which have been certified as above is limited to 50% of the aggregate market value of the lands within a district, and of the water, rights, canals, reservoirs, reservoir sites and other irrigation works owned or to be acquired or constructed.

The principal and interest of the bonds are, by law, paid by the reserve derived from the annual assessments upon the land in the District, and all the lands in the District shall be and remain liable to be assessed for such payments as herein provided, and under and subject to the provision of this Act. The lien of the tax ranks AHEAD of that of all first mortgages.

The law provides that the Board of Directors of the District shall certify the equalized assessment roll of the District to the COUNTY ASSESSOR, whereupon the County Assessor enters same upon the COUNTY assessment roll in the same manner that municipal assessments are entered by him on said assessment roll. Such tax is collected and accounted for IN THE SAME MANNER AS MUNICIPAL TAXES, and the collection thereof enforced in the same manner as the other taxes of the county.

Legality of the Issuance and Sale of These Bonds Has Been Approved by Messrs. Teal, Minor & Winfree, Portland, Or.
