

LANDLORDING IN NEW YORK

NEW YORK—They wouldn't pay an advance of \$5 a month rent unless the landlord would give them a year's lease and the landlord threw them out. There were 40 families of them. The scene is in East 105th-st.

"My Best Friend For Ten Years"

"Crescent Baking Powder is not a fair weather friend," enthusiastically writes a user of Crescent Baking Powder. "It has been my best friend for ten years. It is on hand, always ready to work for me the year round. Delays, interruptions, unexpected events, and any one of the many annoyances all seem to smooth out when it comes to baking the cakes or biscuits with Crescent."

Crescent makes light delicious foods—whole, some and sweet

Crescent Baking Powder

CRESCENT MFG. CO., Seattle, Wash.

Some Wonderful Car Bargains

One 1918 Nash Cloverleaf 4 passenger in fine condition, cord tires all around, good upholstery, looks nearly as good as new. Will be sold very cheap.

One Mitchell Six.

One 1918 Oakland

Two Ford Roustabouts.

If you are interested in a used car CHEAP, it will pay you to see these.

Gertson & Marty

Phone 595

639 Cottonwood St.

OVER 2,000,000 CALVES

Immunized against Blackleg through the use of BLACKLEG AGGRESSIN

One treatment immunizes for life.

Saves revaccination. Price 23 cts. per dose. Write for free booklet. Why pay more?

PURITY SERUM CO., Box 1788, Spokane, Wash.

Doctor Issues Warning. And Tells How to Stop Tobacco Habit

New York, Dr. Connor, formerly of Johns Hopkins Hospital, says: I am often asked if I know anything to stop the tobacco habit and I always recommend Nicotol, which I have prescribed with great success. Nicotol contains no habit-forming drugs, is absolutely harmless and produces astonishing results in a very short time. The use of tobacco saps the vitality, vim, vigor and ambition of the slave who is enthralled by its seductive effects. It undermines the health and leaves the victim an easy prey to general debility, throat and lung troubles, nervousness, insomnia, heart trouble, kidney trouble, headache, tongue and lip cancer and even blindness. Physicians the world over often trace the start of the above disease and many others to nicotine poisoning.

Go to any drug store and ask for Nicotol tablets. Take one tablet after each meal and in a short time you will have no desire for tobacco—the craving will have been left you. With the nicotine poisoning out of your system your general health will quickly improve. Note: When asked about Nicotol tablets, one of our leading druggists said: "It is truly a wonderful remedy for the tobacco habit, away ahead of anything we have ever sold before. We are authorized by the manufacturers to refund the money to every dissatisfied customer and we would not permit the use of our name unless the remedy possessed unusual merit." Nicotol is sold in this city under an iron-clad money-back guarantee by all up-to-date druggists including Pendleton Drug Co. and Koopman Bros.

EXPERTS REPORT ON WATER SYSTEM

Continued from page 9.)

be cleaned out by digging down and opening up a few of the wees at intervals.

In the very coarse gravel in which the water is found along the Umatilla, we believe that just as good results would be secured by the use of wells at intervals of 100 to 200 feet and intermediate pipe laid with tight joints to exclude weed growth. In the event of future developments or in case of necessary repairs to the present layout, we would suggest a design for a well with concrete block curbing in the lower portion, constructed in such a way as to permit free infiltration of the surrounding water. Such wells could be constructed very cheaply, and would give access to the line for repairs which, with the elimination of open joints, should be seldom necessary.

Recommendations.

At the present time there is practically no data upon the hourly, daily, or monthly use of water in the city of Pendleton or the distribution of the use among the different parts of the city. The only record of consumption is that obtained from a summation of the metered outlets, which is known to be only a portion of the flow which is brought into the city by the conduit. The condition is similar to that of a merchant who conducts his business without accounting records, and we are handicapped in formulating our recommendations just as an auditor would be who is called into such a mercantile establishment.

We have already referred to Mr. Hayes, city water superintendent, a plan for installation of weirs on the intake and overflow from the reservoirs. These should be provided with recording gauges, which will furnish a continuous record of the water used. At the outset we do not recommend any additional measuring devices on the system, but believe that after a couple of months' record from these weirs, giving the actual use of water by the city, have been obtained, the losses revealed will be serious enough to justify the installation of additional meters, and the tracing down and elimination of excessive leakage in the system. A thousand gallons of waste from the system which is stopped, justifies a great an expenditure as bringing a thousand gallons additional water into the reservoirs. In fact, the stopping of waste is of more actual value than additional water for the reason that the cost of waste water is made up in part of the cost of the larger main, valves and materials which must be provided to carry it.

With view to the future development of additional supplies along the Umatilla river, we advise the adoption of a program of future engineering studies, surveys, and measurements. As we see the engineering work to be done, there is no occasion for the organization of a large party or undertaking the work on a large scale. In fact, the work of measurement and keeping of records is such that it cannot be hurried. Preferably, a party of two or three men should be utilized over a period of a year or more in the installation of wells, measurement of ground water flow, recording elevations, taking temperatures, and sampling water for chemical analysis, or other work which may be incidental to a thorough ground water survey of the Umatilla river valley.

The ultimate result to be worked for is a complete map and record of the various ground water sources along the Umatilla river, their physical characteristics, extent, and feasibility of development. With such data and knowledge of the present requirements and rate of increase, the water commission would be justified to make plans years in advance for bringing in of this or that spring or source of supply, selecting in each case, the one which is cheapest or fits in best with the general scheme. It is possible to measure and investigate a given supply in such a way that the flow to be obtained from it can be predicted with a reasonable certainty, and construction need not be undertaken in a haphazard manner, or without definite assurance of results.

From surface observations, it is our opinion that the most available additional supplies for early use are an extension of the Chaplish Springs layout and the bringing in of Squaw creek ground water. We offer this information, however, with the reservation that it may be later modified when actual sub-surface investigations have been made.

Respectfully submitted, BARR & CUNNINGHAM. By JOHN W. CUNNINGHAM.

JOURNALISM SCHOOL AT STATE UNIVERSITY

(Continued from Page 7.)

"Old Oregon," the alumni monthly, and "Oregon Exchanges," the newspapermen's magazine, give opportunity for laboratory work in journalism. These three publications are prepared by the senior class in editing.

Business and mechanical problems of the newspaper, as they exist in Oregon, are handled in the class in publishing. Cost-accounting and a knowledge in materials, and making up of books are taught in this course. Fundamentals of printing designed to fit journalism are also included in the curriculum.

Printing Office. The school is equipped with a complete printing office, in which is done the printing and publishing for the university. The equipment includes a model 19 linotype, a Babcock Optimus press, a job press, power paper cutter, stitchee and a wide variety of job type.

Graduates of the Oregon school of Journalism, young as it is, are already holding executive positions on newspapers all over Oregon, Washington and Idaho, with several in California. Every member of last year's graduating class had a position waiting for him at the end of the course.

FIRST JAPANESE MAIL SERVICE IS SUCCESS

TOKIO, Oct. 26.—The first Japanese aerial mail attempt was successfully made yesterday. The flight was from Tokio to Osaka a distance of approximately 200 miles.

WHO

Wants to Be a Movie Star?
Wants to Be the Leading Lady?
Wants to Be the Leading Man?
Wants to Be Baby Atherton?

If you are interested in the movies, here is the chance of a lifetime.

Under the auspices of the East Oregonian a moving picture entitled "A Romance of Pendleton" is to be filmed right here in Pendleton, starting October 31st, by the Hurdis Film Company, and the entire cast will be composed of

Pendleton Talent

Young men and women, boys and girls, here is your opportunity to appear on the screen, right here at home, in a photoplay with incidents and scenes laid in Pendleton.

Here is the Chance You Have been Waiting for

Read the full details of the East Oregonian moving picture in each edition of our paper now.

Considering that the scenario of "A Romance of Pendleton" permits of a large cast, every one in the contest will have an opportunity to appear before the camera, and then film will be loaned to you to submit your work to the regular releasing companies.

This is probably a better opportunity than your favorite of the screen had when they started to ascend the ladder to fame and fortune. There is an old saying "OPPORTUNITY KNOCKS ONCE AT EVERY DOOR." To the young people who are interested in moving pictures this is indeed the GOLDEN OPPORTUNITY.

Only little girls, 3 to 6 years of age, are eligible for the part of Baby Atherton.

All that wish to take part please send in your application immediately and report at the East Oregonian office on Friday, Oct. 31st at 10 a. m. sharp for instructions.

Come on you Fairbanks, Chaplins and Pickfords of Pendleton. Here's your chance to be a movie star.
