## OPERATORS' MARGIN 40 PERCENT SAYS GARFIELD

WASHINGTON, Nov. 20.—Declaring public interests to be the "paramount issue" in the coal situation, Fuel Administrator Garfield Wednesday issued a warning against attempts to charge an excessive price for fuel, in an address to operators and miners in a conference here to settle differences.  
 After flatly refusing to say whether or not the government will permit any increase in coal prices in case the miners get wage increases, Garfield read figures showing the margins which operators make and the per cent of mining costs that goes into the country averaged a margin of about 40 per cent on a ton after paying the costs of mining and selling the coal at the government price of \$2.61, Garfield announced.  
 "Radicals have always exceeded the supply of fatted calves."
