### "GROWING FAST"

You may possibly feel that because you are not employed in the manufacturing business, this Home Products movement fails to interest you. Let us see. The following is a fair estimate of the manner in which a family of four would dispose of an annual income of \$70.00 per month.

Shoes	\$ 35.00	Insurance	\$ 35.00
Clothing	180.00	Amusement	15.00
Groceries, meat, etc.	260.00	Charity	10.00
Fuel	35.00	Sundries	15.00
Light	15.00	Savings or surplus	60.00
Rent	180.00		\$840.00

You must be connected with some business that is allied with one of the above lines—you may clerk in a shoe store, your salary depends upon the patronage given your employer. A family spends \$35.00 a year for shoes. Your employer gets his share of this, but the same family spends \$260.00 a year for groceries, etc. This helps the grocer and his employees who in turn buy shoes. The same family spends \$180.00 for clothing. The clothier and his clerks buy shoes too. Everyone who benefits by the money thus put in circulation buys shoes.

Get the idea? It does not matter who you are or how you earn your money, you are vitally interested in having payrolls increased. The money spent by the employees of the manufacturing concerns not only affects your line of business directly, but it also affects it indirectly by affecting other lines of business. Every additional industry that locates here means more wage earners. Every added wage earner means another customer and the more customers the greater trade possibilities of the merchant. Your salary depends completely upon the welfare of the merchants. There is not a man living here today that will not directly profit by **Buying and Boosting Home Products.**
