Aches and Pains of Rheumatism. Sometimes Almost Unbearable.

There are weather conditions that make rheumatism worse. They are not the same in the cases of all persons. Some victims of this disease suffer more in dry warm weather than in moist cold weather, but all suffer more or less all the time.

The cause of rheumatism is an excess of uric acid in the blood, affecting the muscles and joints. Hence the blood must have attention for permanent results in the treatment of this disease.

Hood's Sarsaparilla has given entire satisfaction in thousands of cases. Do not fail to give it a trial. If a laxative is needed, take Hood's Pills—they don't gripe.

DISCORD GROUNDLESS SAYS LEGION LEADER

INDIANAPOLIS, Jan. 10.—No just reason exists for discord between the American Legion and organized labor, Franklin D'Olive, commander of the legion, stated today. The statement was in answer to certain organizations which have declared the legion to be opposed to their armies. D'Olive said: "The attitude of the American Legion toward organized labor is exactly the same as its attitude toward all groups of citizens who are interested in a square deal for all in the maintenance of law and order and the protection of institutions handed down to us by our forefathers."

REPATRIATION OF MEN IN SIBERIA TAKEN UP

WASHINGTON, Jan. 10.—Arrangements were completed today for repatriation of Czech-Slovak, Polish, Jug-Slav and Rumanian troops from Siberia. The United States transports Grant and America will leave New York soon for Vladivostok to begin the withdrawal of these forces, the state department announced today. The transports are expected to reach Vladivostok about February 10. They will remove a force of over 10,000. Announcement of these troops removal foreshadows the removal of 9,000 Americans in Siberia, it is believed.

It is planned to organize Johnson clubs throughout the state.

PALMERS' DENIES PACT PRECLUDES PUNISHMENT OF "5"

WASHINGTON, Jan. 10.—The "big five" packers are still subject to prosecution despite their agreement with the government to get rid of their side lines, Attorney General Palmer told the senate agricultural committee today. Palmer, who drew the agreement with the packers, denied emphatically that he promised them immunity. "I could go into court tomorrow, either

legally or criminally," he said "if I were convinced that it was a wise thing to do for the public good. Nothing in the arrangement with the packers precludes prosecution for their past legal acts."

"In view of your agreement with the packers will you prosecute them?" Senator Norris asked. "I ever said so before," replied Palmer. "But I do not intend to prosecute them. Under the circumstances, I should doubt the propriety of

The proposed plan of assessing all lands in Spokane county on a basis of 10 cents per acre for squirrel extermination has been pronounced illegal and it will not be necessary to rearrange the classification of lands for special assessment purposes.

To try to control railroad rates by arbitrarily limiting profits is to let the manager who makes his profits by efficiency and economy on the same level as the one who tries to accomplish the same result through extortionate charges. —Nailley Railroad Securities Commission; Report to the President—1911.

THE old-time pack-bearer could carry a hundred pounds ten miles a day.

The railroad is the modern pack-bearer. For every employee it carries 2,000 times as much.

Back of each railroad worker there is a \$10,000 investment in tracks and trains and terminals, with steam and electricity harnessed like a great beast of burden.

Without this mighty transportation machine the railroad worker could do no more than the old-time packer. But with it he is enabled to earn the highest railroad wages paid in the world, while the country gains the lowest-cost transportation in the world.

The modern railroad does as much work for half a cent as the pack-bearer could do for a full day's pay.

The investment of capital in transportation and other industries increases production, spreads prosperity and advances civilization.

To enlarge our railroads so that they may keep pace with the Nation's increasing production, to improve them so that freight may be hauled with less and less human effort—a constant stream of new capital needs to be attracted.

Under wise public regulation the growth of railroads will be stimulated, the country will be adequately and economically served, labor will receive its full share of the fruits of good management, and investors will be fairly rewarded.
