Of Utmost Importance

Pure, emulsified cod-liver oil is not medicine as many are prone to think of medicine.

SCOTT'S EMULSION

is a form of growth-nourishment that is of utmost importance to many children. That most children *relish and thrive on Scott's* is a "truism" accepted the world over.

Give Scott's to the children and watch them grow strong!

START TOMORROW AND KEEP IT UP EVERY MORNING

Get into the habit of drinking a glass of hot water before breakfast.

Millions of folks bathe internally instead of loading their system with drugs. "What's an inside bath?" you say. Well, it is guaranteed to perform miracles according to hot water enthusiasts.

There are vast numbers of men and women who immediately upon arising in the morning, drink a glass of hot water with a teaspoonful of limestone phosphate in it. This is a very excellent health measure. It is intended to flush the stomach, liver, kidneys and intestines of the previous day's waste, sour bile and indigestible material left over in the body which if not eliminated every day, become food for the millions of bacteria which infect the bowels. The quick result is poisons and toxins which are then absorbed into the blood, causing headache, bilious attacks, foul breath, bad taste, cold stomach trouble, kidney misery, sleeplessness, impure blood and all sorts of ailments.

People who feel good one day and badly the next, but who simply can not get feeling right are urged to obtain a quarter pound of limestone phosphate at the drug store. This will cost very little but is sufficient to make anyone a real crank on the subject of internal sanitation.

Put yourself in their place!

YOU may think you read about other people when you read fiction—but really important, really great writers simply hold the mirror up to nature. They show you the man or woman you are—that you think you are—that you'd like to be—or that you're glad you are not. Look through these little glimpses of Cosmopolitan stories; then get the December number and—put yourself in the place of these people.

Do you love power more than honor?

Of course you don't. But put yourself in the place of the man who could by forfeiting honor, have founded a kingdom, gained the love of the most beautiful woman in Kashmir and lived happily thereafter "forgetful of the world and by the world forgot." This is the theme of the vibrant, colorful story by William Ashley Anderson in December Cosmopolitan.

If your son wanted to marry Nan?

The father was called The Laird of Tye. He loved his son more than he loved anyone else in the world. Donald loved his father and he loved Nan of The Sawdust Pile, too. An interesting triangle. Put yourself in the place of Hector McKaye, Donald or Nan. You can learn much about yourself and them in Peter B. Kyne's great novel appearing in Cosmopolitan.

After the ceremony

Alone at last in a rural retreat he left his young bride for a moment. Then the other woman appeared on the scene with a diabolical scheme worthy of a woman scorned. She met the bride, told her everything and then—the scene between husband and wife and—the other woman. Bride—husband—the other woman; if you were either of the three, how would you have handled the situation? The story is by Albert Payson Terhune and it's in December Cosmopolitan.

Suppose you were this doctor?

You are an aristocratic doctor. Your daughter is a sweet, charming girl for whom you have great hopes. Jim is your chauffeur. The only things in Jim's favor are good character, industry, talent, personality and presence. But he's poor. Sort of a modern setting for an old-fashioned situation. What would YOU have done about it if you'd been the doctor? Probably the same as Dr. Berrian did in Josephine Daskam Bacon's story in December Cosmopolitan.

Anetta the Third was not a queen

Queens don't work in shoe shops and yearn to be cabaret dancers. In fact, Anetta was of extremely lowly parentage, but she was pretty and wilful, as girls sometimes are, so she became a dancer. Then, later, she had to make a decision of some moment—she made it—but what would YOU have done in her place? Interesting speculation will follow a reading of Ida M. Evans' story in December Cosmopolitan.

Would you have been afraid?

Where? Oh, anywhere there's anything to be afraid of. Probably you would, and you wouldn't know why. That's for science to find out and explain to you. Science has found it and in "Devils" Harvey O'Higgins tells you all about it. He also tells how anger causes hay fever and a lot of other interesting and important things that may cause you to change your ways of thinking. Read his remarkable article in December Cosmopolitan.
