Elderly People Have A Daily Health Problem

Stomach muscles and digestive organs slow to act as age advances

M OST people find the years slipping by without realizing it, until suddenly confronted with the fact that they can no longer digest everything they would like to est. It then becomes their daily task to avoid what they know to be chronic constipation.

When exercise and light diet fail it will be necessary to resort to artificial means. Strong physics and cathartics, however, are not advisable for elderly people. They act too powerfully and a feeling of weakness results.

What is needed is a laxative containing effective but mild properties. This is best found in Dr. Caldwell's Syrup Pepsin which is a combination of simple laxative berbs with pepsin. It acts gently and without griping, and used a few days will train the digestive organs to do their work naturally again without other aid.

Dr. Caldwell's Syrup Pepsin has been on the market since 1892 and was the private formula of Dr.W.B. Caldwell, who is himself

past 80 years of age and still active in his profession. It can be bought at any drug store and one bottle is enough to last even a large family mony months. It is a trustworthy preparation.

In spite of the fact that Dr. Caldwell's Syrup Pepsin is the largest selling liquid laxative in the world, there being over 6 million bottles sold each year, many who need its benefits have not yet used it. If you have not, send your name and address for a free trial bottle to Dr. W. B. Caldwell, 511 Washington St., Monticello, Illinois.
