

"HANDCUFF MAN" NOT INSANE SAY CONDON EXAMINING OFFICIALS

Foreigner Taken Here in Piti-
able Plight Several Years
Ago is Now Working as La-
borer; Bears Big Scars.

Nadatto Sovina, foreigner who was taken into custody here three years ago wearing handcuffs which had been on his hands for 17 months, was recently declared sane by Condon physicians who made an examination after the man had been apprehended in Gilliam county.

Sovina bears scars on his hands as the result of the wearing of manacles placed there by Canadian immigration officers. When he escaped the officers, he made his way to the United States where he succeeded in

breaking the chain between the cuffs, and was unable to rid himself of the rings.

Fearing detection, Sovina continually pushed the rings above his wrists so that his sleeves would hide them. The flesh swelled to such an extent that when Sovina was taken into custody here it was necessary to cut away the skin in order to fit off the handcuffs. There are now scars nearly an inch deep on his arms just above the wrists.

MOTHER ENDS LIFE TO SAVE HER CHILDREN FROM WHITE PLAGUE

CHICAGO, Jan. 20.—"I love you, Joe. God has afflicted me. I know you are terribly afraid of catching it. I love my children, but I'm leaving all."

Mrs. Lillian Meitz, a victim of the white plague, shot and killed herself last night. She left the foregoing note for her husband. She was the mother of two children.

94 BILLS, FEW OF EMERGENCY CHARACTER, ARE MADE LAW BY SPECIAL LEGISLATURE SESSION

During the special session of the legislature a total of 94 measures were passed by the two houses. The list of bills and resolutions is as follows:

Light Weight and Durability is the Best Guarantee of Quality

The difference between a Maxwell and a larger car is largely a matter of weight. Each carries the same average passenger weight, travels over the same roads and at the same speeds.

Per pound of metal the cost to make each is about the same. One lasts about as long as the other. The mission of the Maxwell is to carry the same load, over the same roads, and at the same speeds at extremely low costs.

That is highly efficient transportation. It is expensive to haul dead weight. Therefore, every superfluous pound has been eliminated.

Light but strong metals have been used. These are the quality metals. They provide the "toughness" the wear, the ability to stand gas strain and shock; and yet they are light in weight.

This is the secret of the Maxwell. It explains why a Maxwell delivers a mileage—that is inexpensive—that is troubleless—that is almost endless.

The greatest efficiency economy record ever made is held by a Maxwell.

It ran 22,020 miles continuously without one single stop of the engine, carried a full passenger load, averaged 22 miles to the gallon, at a speed of 25 miles per hour.

In five years 200,000 have been built, and these have made many friends. 1920 production increases to 100,000 Maxwells.
