Efficiency Counts

in everything. The Labor problem is how to convince the laborer that the fundamental thing is an increase in

PRODUCTION

There is no other way to reduce the cost of living in this country but to increase the production of necessities. No way to decrease the cost of other commodities except by increasing the production of these commodities. Increased efficiency in all lines is absolutely essential and the quicker we find it out the better. Produce more and do our work just a little better than is expected of us. See us concerning your building plans. Let us explain our service to you. Call us for the best Rock Springs Coal.
