Up to press time today 425 licenses had been issued and indications pointed to a rushing business this afternoon. Applications have been received from every postoffice in the county, indicating that there is not an organized attempt in any community to defeat the law. Since it was recently reported that the law is valid, there has been an added impetus to the licensing. After next Sunday unlicensed dogs are subject to confiscation.

WHITE TRUCKS SELL READILY BECAUSE OF LASTING QUALITIES

Ability of Truck to Give Long and Continuous Service Means Much to Purchaser.

That truck buyers are coming more and more to make their purchase not on the basis of initial cost but on the prospect of long, continuous service, is the assertion of A. A. Frenzel of the Frenzel-Waites Motor Co., distributors of White trucks in the Umatilla county territory.

"Permanence in a motor truck is the important factor," declares Mr. Frenzel. "So many different makes of trucks are being offered for sale for such a variety of reasons that the simple fundamentals of value in a truck are apt to be overlooked by the purchaser.

"An important question to ask is, 'How long has the truck been built?' Until a truck has been operated a number of years it has had no chance to prove its life. It is still experimental. There are Whites, eight and nine years old, which have run 200,000 and 300,000 miles and are still in the running.

"It is important to consider, too, what a truck has actually done, over a period of years, in the hands of thousands of owners. The steadiness with which it works, its ratio of days in active service, in an important factor in low cost of handling. All records of which we have any knowledge show that White trucks have an unusually high operating percentage.

"Who are the owners?" is another question that demands answering. If large fleet users, governed by company cost records, buy a certain make, year after year, in ever-increasing numbers, their choice is a pretty safe guide. There are over 2,000 White fleets in active service, totaling more than 35,000 White trucks, exclusive of all single truck installations.

"These are matters that every prospective truck buyer should settle to his own satisfaction before he closes with any dealer."—Adv.
