What Is the E. R. Parker System?

THE E. R. Parker System in Dentistry is the result of the experience of Dr. Painless Parker and his associates extending over twenty-seven years. Instead of one man practicing in a small way in a small office, several dentists practice together under the Parker System in large offices, where there is room for complete equipment.

Some of the System dentists extract teeth, some fill teeth, some make crowns and bridges, some make artificial plates and some treat diseased teeth. In this way each patient is cared for by a dentist who is experienced in the kind of work each patient needs.

Dental work done in this manner is not only done better, but in less time, making fewer visits necessary, and the saving in time helps to make prices lower.

There are twenty-four offices where the E. R. Parker System is used, located in different cities. Thousands of patients are treated in these offices, and the large quantities of dental supplies used are bought for less money than has to be paid for small quantities.

All dentists using the E. R. Parker System are registered, licensed and experienced. The work they do is done so well that it can be guaranteed. You are sure of satisfaction.

Under the Parker System no charge is made for examinations and advice. You can find out what your teeth need without having to pay a cent. The best things known in dentistry to overcome pain are used in Parker System offices, so you need have no fear at all.

The whole idea is this: Fine dentistry, fewer visits, moderate cost, no fear of pain, satisfaction.

White Truck

Most trucks are made to sell, not to give service and long life.
Are trucks bought from 30 per cent to 50 per cent less than those manufactured by the high quality makers just as good? This can be answered by yourself.
If price and quality mean nothing to a man, then the authority like Damascus, Sheffield and Bessemer on metals is useless to the world today.
