Burn Gas

With the coming of Spring and Summer, have a **GAS RANGE** installed. Do away with the long hot days. The ugly effects of a hot fire can easily be done away with by the use of gas.

GAS IS CHEAPER THAN COAL OR WOOD

When you are ready to begin your work, simply turn the "switch"—no fires to make, no fuel to carry. When you are through with your work, your gas is easily turned off. No waste fuel, no steaming hot room.
