A very short time indeed in which to prepare. Our stocks are complete as never before. Immense showing of the season's best and most wanted styles are here for your choosing. Come early and often.

## ABOUT THE NEW COATS

On the whole it may be said that coats are of the top-coat variety, which harmonize well with the shorter skirts. Coats of this season are full, so that the wrap may be loose and roomy, easy to get in and out of and not likely to crush fluffy things beneath. The fullness, however, is judiciously restrained in one way or another, by inside or outside belt, pleating or gathers, so that the silhouette remains quite slim and well defined.

Arm Holes in general, are of the set-in, raglan or kimona-sleeve sort, repeating the idea of comfort expressed above. The shoulder tends to a slender, drooping effect. Materials are of the delightfully fuzzy, wooly sorts for sports and general utility wear, while introduction of smooth finished cloths, usually in combination, is made for more elegant garments.

Although, as has been said, the short coat seems to prevail, yet a longer model, after the order of the Redingote, is provided for the use of those who particularly desire a practical garment of that sort.
