## Paving May Not Be Prohibitive.

Prices on paving for Pendleton may be found not so prohibitive as was at first thought, City Engineer F. B. Hayes said today. The engineer has completed a few pieces of new street grade for paving and on estimates already made finds that the cost will run about 15 to 20 per cent above the old estimates, instead of 40 per cent as he at first supposed. The increase will be slight if the substitute paving is used. This paving is being laid on state highways and is guaranteed for the same length of time as the paving called for in the original specifications. Street grades for three improvements have been completed and will be presented to the council tonight for their rejection or approval. Some changes have been made. Specifications and estimates will not be ready for three to four weeks.

Mrs. Ellis will, as largely as her duties permit, appear also in the schools of the county.
