484 SCHOOL CHILDREN DAILY RECEIVE MILK

Out of 812 Pendleton school children, who attend Lincoln, Washington, Hawthorne and Field schools, 484 receive milk daily, according to a report received today from the Oregon Dairy Council.

In Lincoln school, 170 of the 246 pupils receive milk each day, says the report. One hundred fifty-two of the 257 Washington school pupils receive milk, while 28 of the 45 Field school pupils receive milk.

The report gives the following information regarding the serving of milk in Pendleton schools:

"In Pendleton, the first and second grade children are having half pints of milk served them daily. They do big work in child welfare in Pendleton. The home demonstration agents, the schools, the child welfare clinic and the parent-teachers associations cooperate with fine spirit."

Pendleton, Portland, North Bend, Medford and Grants Pass are the cities in the state which the report cites as having carried on good work in increasing the amount of milk in school children's diet.

MESSAGE TO MARS MAY NOT BE SENT

(By Associated Press.)
OMAHA, April 21.—The ascension in a balloon of Professor David Todd of Amherst, and Ballonist Leo Stevens

in an effort to signal or communicate in some way with the planet Mars, will in all probability not take place on next Friday as originally planned.

Word was received here today from Professor Todd, stating that he was ready to make the attempt on Friday if the Omaha chamber of commerce had met his conditions. Inquiry brought forth the information that the chamber ceased to be interested in the venture some time ago.

NEW PRICES THREATEN TO BANISH SUGAR BOWL

(By Associated Press.)
SEATTLE, Wash., April 21.—Retail grocers today professed to have advance information that jobbers are planning to charge the trade \$20.50 or \$21.00 a hundredweight for a sugar supply expected from San Francisco on the steamer Fred. Baxter, due here tomorrow. Members of the Seattle Grocers' Association may consider the possible banishment of the sugar bowl and restoration of the war time rationing system in the event they are called upon to pay about 25 cents a pound for sugar, which now does not seem improbable, they declared.

Paving Operations to Start
Paving operations from Dixie's corner to Athens, on the Oregon-Washington highway, will begin Monday, if no change in plans is made. This section of the new road will be closed for traffic, necessitating a detour from Dixie's corner into Athens over the hill to the left of the present route. The highway will be closed for about a month, engineers say. When the paving is completed on this remaining strip, there will be a continuous paved highway from Pendleton to Athens.

Road Settlement Made
After dickering for nearly a week with Chas. McLeavie, of Long Beach, Cal., the county commissioners today reached a settlement with him for the routing of the Havana-Helix highway through his ranch three miles south of Helix. The arrangement makes possible a straight road from the top of the hill above Havana into Helix. Eighteen acres of Mr. McLeavie's ranch will be cut off by the location of the highway through his place and he and the commissioners this morning agreed upon a reasonable price for this damage. All rights of way on this road are now amicably adjusted and work of graveling it will start shortly.

Plaintiff Given \$687 Damages
Arthur L. Luce was given special damage of \$537 and punitive damage of \$150, for a total of \$687, from John McElroy, by the circuit court jury which heard the case tried yesterday. Luce sought damages totaling \$3000 for alleged assault and battery. Following the returning of the verdict the jury was dismissed for the week.

FARM BUREAU LEADER EMPHASIZES HELP OF BEES TO FRUIT CROP

R. L. Blackburn, Farm Bureau member from Freewater, states that in 1915 when there were plenty of bees in his vicinity and some wild cherry trees for pollinizers he grew four tons of cherries. As the bees became less in his vicinity his crop dropped from year to year until two years ago. Not knowing the necessity for pollinizers he cut down his wild cherry trees. This past year, with no bees or pollinizers in the vicinity and a good crop year he produced only about 500 pounds of cherries on the same trees which formerly had yielded four tons.

In a fruit country bees are quite important but are hard to keep an account of the spray. Mr. Blackburn cites as examples the heavy losses of the bee keepers in the Freewater district due to spray poison. Christy Rogers once had 100 stands and now has about 20. Marvin Dyer's has been re-

duced from 14 to 3; Roy Mason's from 40 to 2, and Arthur Spence has lost all of his 12 stands.

It is practically impossible to control fruit disease and not kill the bees, so Mr. Blackburn states that it will be necessary to remove them from the fruit district during the spraying season. Fruit growers can make conditions better by keeping the clover and other blooming cover crops mowed down under the trees.
