'GRAIN GRADING CIRCUS' WILL VISIT IN COUNTY

The Federal Grain Supervision "grain grading circus" of the Bureau of Markets, United States Department of Agriculture, is spending the month of June in Eastern Oregon and

will make several one-day stops in Umatilla County. Right now, before the 1920 harvest season begins, a fine opportunity is offered to learn about the federal grain standards and their correct application.

Federal grades for wheat, shelled corn, and oats are still effective. The grades for wheat were established before the grain corporation began its control of wheat marketing, and whether or not there is a fixed price established for grain of the coming

crop the federal grades will continue to be in force.

At the request of the grain trade, a series of meetings have been scheduled to show the actual grading of grain under the federal standards, especially emphasizing those factors which affect the grade of the grain grown in this section. Everyone interested in the grain business, which includes the grower, should know the correct method or making the few determinations which enter into the

grades as assigned by the licensed inspectors, particularly the dockage and test weight per bushel determinations. Two representatives from the Portland federal grain supervision office will be in charge of these one-day meetings, bringing standardized equipment with them. Every wheat grower is urged to attend and tell his neighbor about this event and be sure to attend at least one of these meetings. The performance starts at 1:00 p. m. If one has any grievances about the federal grades or their application, he is invited to tell them to these men who will have charge of the meetings, which will be very formal.

The Pendleton meeting is June 11 at the county library and the Athena meeting on Wednesday, June 2.

DRASTIC DEFATION OF CREDITS APT TO BRING HARD CRISIS IS WARNING

CLEVELAND, O., May 26.—Current price reductions are not due to over production, in the opinion of P. H. Sison, vice president of the Guaranty Trust Company of New York, who warned against too rapid deflation of credits in an address before the eighth annual convention of the Association of Reserve City Bankers yesterday. Those who are clamoring for a rapid fall in prices, he said, "should bear in mind that drastic deflation will mean painful economic adjustment, of which widespread unemployment and business distress would be features. "The average man should remember that there is not much advantage in being able to buy twice as much for a dollar if he does not have the dollar."

ern trip to inspect the electrification of the Chicago, Milwaukee and St. Paul road. Milwaukee officials will accompany the party.
