COLLEGE STUDENTS AT HERMISTON RETURNING

HERMISTON, June 21.—(Special to the East Oregonian.)—Mr. and Mrs. E. T. Eriksen and Miss Norma Elizabeth Eriksen arrived Monday morning from Corvallis where Miss Norma was a member of the class of 1920 at O. A. C. The Eriksens were former residents of Hermiston but now reside in Corvallis. Mr. Eriksen will leave Sunday evening for California but Mrs. Eriksen and daughter will visit with friends here until the middle of July.

Miss Eleanor Cassatt returned Saturday from Corvallis where she has been attending O. A. C. She plans to spend the summer vacation with her

parents, Mr. and Mrs. J. Cassatt. Rev. W. H. Cox, pastor of the Baptist church of Pendleton was a Hermiston visitor the fore part of the week.

Mrs. E. P. Dodd and daughters, Isabelle and Ruth, left Thursday afternoon for a week's visit with relatives and friends in Pendleton.

George B. Clark, bookkeeper for the Newport Construction Co., left Thursday for Portland where he will remain until after Shrine week.

Mrs. Joyce Hays of Pendleton, is a week-end guest of Mrs. H. G. Newport.

J. H. Strolin was a visitor in Hermiston several days this week.

Charles Smith of Portland, spent several days in Hermiston, returning to his home Wednesday evening.

W. H. Warner, father of Attorney W. J. Warner, left Tuesday for his home in Springfield, New York, after visiting his son and family for the past month.

Mrs. N. A. Burdick, mother of Mrs. E. J. Kingsley, arrived in Hermiston Monday from Metolius, Oregon, to visit with her daughter this summer.

Mayor F. C. McKenzie disposed of his residence on Main street to William Rhodes, the consideration being \$2750.

Miss Bertha McKee, daughter of Mr. and Mrs. H. McKee will leave Sunday for Ellensburg, Wash., where she will take a 6 weeks' course at the normal school. Miss McKee was a member of the Hermiston high school class of 1920.

F. W. Swayze and family have taken possession of the L. D. Lay residence, August E. Bensch then moved to the Swayze place which he recently purchased. R. E. Mitchell, Hermiston druggist, purchased the old Crawford house recently occupied by Mr. Bensch.

G. H. Adams, accompanied by his mother and Mrs. Otto Heini, left Monday for Portland where Mr. Adams

will transact business for the new playhouse, now well on its way to completion. Mrs. Adams and Mrs. Heini will visit friends during their stay in Portland.

W. L. Blessing for 10 years connected with the International Harvester Co. before coming to this city, has now an interest with Sappers, Inc. Mr. Blessing and family expect to move in town in the near future after disposing of his ranch three miles east of town.

Mrs. P. A. Czechik was a Pendleton visitor Wednesday.

J. E. Gallaher of Weston is visiting his brother, Rev. Gallaher, this week.

Mrs. P. E. Steel and Judith Kelly entertained about 20 friends at the Steel home in honor of Miss Dunn, cousin of Mrs. Steel, Thursday evening. Miss Dunn left the next day for her home in Denver, Colorado.

Miss Frances Gardiner was a Hermiston visitor Friday and Saturday of last week. Miss Gardiner was a teacher in the Hermiston schools the past year, having left at the close of school for Portland and is now returning to her home at Baker.

The dance Thursday evening was well attended by Hermiston young folks as well as the neighboring towns. Elks orchestra of Portland furnished the music.

ures and tribulations. The new community got the benefit just as the John Day will profit thereby. Alfalfa and other crops of quick return, instead of the red apple at the foot of the rainbow ten years hence, had been well established as the only crops for new development in this locality. The people of the nearby communities were insistent on these facts and the new comer scarcely dared to attempt new and untried fields that were in violation of the well established principles and threatened ruin to the smart one and injury to the whole community. All these very fundamental facts have become embedded in the life of the people of these contiguous irrigation districts. To have opened the John Day ten years ago would have cost the settlers who attempted its development hundreds of thousands of dollars more than it will cost them when that great takes place.

Successful Men Wanted

The ultimate object of such development is a successful man on the land and a productive farm. As to the attainment of these ends there can be no question. The land will be worth when developed from \$200 to \$250 per acre subject to water charges. The cost of the water has been estimated at \$1.00 to \$1.25 per acre. Under present high costs this would be greater. No land should be sold to settlers at over \$10 to \$20 per acre. Both water and land should be on easy terms and government charges would be without interest. These lands are easy to develop because of their smoothness and good soil qualities. Changing conditions would cause changes in our figures, but not, relatively, important.

Conditions Are Ideal.

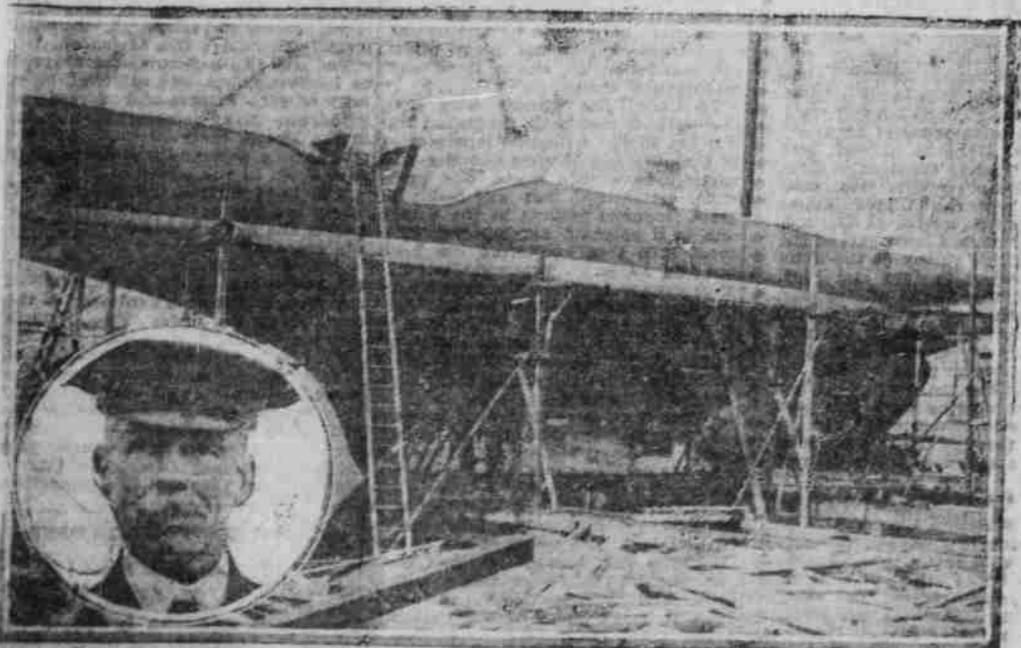

The climate is the very best. The district has long growing seasons, short and mild winters, and as it becomes lined with trees and covered with verdure the usual desert conditions disappear. The altitude is low and being in a dry climate, healthful advantages are great. It should be remembered that this is part of the small area of the Upper Columbia, which is the only locality in this latitude in the United States that has a low altitude and a dry climate. Italy has the only similar condition in Europe.

As to markets, this region is the only possible alfalfa district that can be developed so near to Portland and the coast which is so rapidly becoming a great consumer of alfalfa hay and its products. Western Oregon has pasture grasses but needs the feed values of alfalfa for its dairy, beef and mutton herds in winter seasons. This is another scientific fact of great value to both localities that has been established in recent years in this pioneer irrigation laboratory. The results in a later article. The traveler

passing through the desert stretches along the Columbia Highway often wonders why people live in this desert when the world is so large. They do not wonder when they reach the highly developed areas. They may still be doubtful about the original desert condition of beautiful fields and pretty home lands and gardens. They do not readily believe in the transformation. To convince the public of the possibilities of the burning sands of a western desert is one of the problems not, present and future, of these laboratory experiments will be summarized.

not so easily solved in our laboratory. There is nothing resembling the lap of luxury under a sage brush. It is this problem chiefly that the directors of the John Day must meet before they can realize their ambitions. The public must become interested in a large degree before an enterprise of such proportions can be put over. The merits are beyond question. The facts for construction are available and the methods of development well known. The work of bringing all these into action, is the task that must be accomplished.

SHAMROCK IV., LIPTON CHALLENGER, SHOWING NEW SHARPENED STEM WHICH WAS SENT OVER COMPLETE FROM ENGLAND, AND HER SKIPPER

Medical changes have been made in the hull of the Shamrock IV. Sir Thomas Lipton's challenger for the America's Cup. The above photograph was made while the alterations were nearing completion at Jacob's Island, near New York. Charles Nicholson, the designer, has sharpened her stem considerably and believes he has improved the Shamrock's chances in light weather. The Thomas's craft in the cup races. He now has just arrived in New York.

MISS ELLEN CASSATT'S PRIZE WINNER GOING OVER THE JUMPS AT SOCIETY HORSE SHOW

Miss Ellen Cassatt is an accomplished horsewoman. She demonstrated this by the handling of her prize winner, Mulford, at the benefit of the Bryn Mawr Hospital. Society was out in force and applauded Miss Cassatt as she piloted her handsome mount over the jumps.
