GREAT HIGHWAY IS TO SPAN MEXICO

(By Associated Press) SOGALLES, Ariz., July 10.—A great national highway has been approved constructed by the new Mexican federal government to extend from Sonoma, Sonora, on the international line, along that line to Juarez, opposite El Paso, Tex., and from that point proceed on down the central tableland of Mexico into the City of Mexico. The contemplated highway when completed will be of about 2000 miles. A projected road from Tucson, Arizona, to Fort Loba, on the Gulf of California crosses from this state into Sonora, Mexico, at Sonoma, where the new Mexican national highway starts. Thus, according to plans, the highway from the Mexican capital will connect with the great state road system of Arizona and through that with the fine system of roadways in California.

SAYS HEALTH WORK IN SCHOOLS IS DIGRACE

SALT LAKE CITY, July 10.—Health work as conducted in America's public schools, was described as "a disgrace to the nation" by Thomas D. Wood, member of the Columbia University faculty, in a talk to the National Education Association convention here Wednesday night.

"Principles of universal training must, in a manner consonant with the spirit and methods of democracy, be interpreted and applied in the universal compulsory health and physical care and training of all the children," he declared.

"Children of our country deserve an effective physical care as live stock and as careful attention and cultivation as crops. Shall not the children drafted by compulsory education into our schools be assured of an skillful and satisfactory care as soldiers in camp and trench?"

"Much of the actual health care of the children must be accomplished by the home, by health boards and other organizations. But the school is the universal, the officially credited and the strategic agency to lead in the educational program of health."

"The most vital item in the welfare of any country is the welfare and health of the children. No country is really civilized which does not possess a national intelligence and sense of obligation relative to the health of the children and an effective complete practical program of health care for all the children of the nation."

WAR WORK BOND ENDS; FUNDS ARE DISTRIBUTED

Work of the Umatilla County patriotic service league, organized for war purposes, was officially ended Friday when funds remaining in the treasury were divided between the local Red Cross and Pendleton Post, American Legion. There was \$397.28 to be divided and the Red Cross received two thirds, or \$595.26, while the legion's share was \$299.12. The amount divided was the surplus remaining after \$100 had been appropriated for a newspaper history of the war, to be assembled, bound and field in the Umatilla county library. Most of this record was assembled by Merle R. Chessman, former secretary

of the league, during his tenure of office. Last November a decision was made by officers of the league to close up accounts after Mr. Chessman had left Pendleton and had turned over the records to C. K. Cranston, secretary of the commercial association. Mr. Cranston, with R. M. Mayberry and John Lambirth, formed an auditing committee which decided on the disposition of the funds. The money received by the legion will go into the same fund as that which was presented by the "Silver Greys" an organization of which Mr. Cranston was head, and which recently turned over its balance to the legion and closed its activities.

WALLA WALLA COUNTY HARVEST NEARLY DUE

Walla Walla, July 10.—The wheat harvest in Walla Walla county is from five to 20 days away, according to the section of the county from which reports come, advices received at grain agencies indicate today. One farmer near Oviden expects to start on his turkey red wheat next week.

The grain men of the city have been active all week, keeping a close watch on the result of the north and northwest winds which struck this region on Monday, Tuesday and Wednesday. Some farmers report that some of their spring grain was turned white by it, but Weather Observer C. C. Garrett is of the opinion that the winds did not have enough velocity to do appreciable damage. He says that the winds must have considerable speed to hurt the crops, and the velocity records show that for the first three days of this week they were little more than a breeze.

Although the grain in the western and northern ends of the county is well "in the dough," the report on the grain in the foothills indicate that a hot wind could do a good deal of damage in that region for two weeks yet. There was a change of wind direction Thursday to the south, southeast and southwest, which was prevailing today, and this brought cooler conditions. The cool nights have also been a great help to the farmers this week.

Grain agents have been bringing in heads of bluestem, turkey red and the hybrid varieties all of the week and all indications continue to point toward a fine crop. Bluestem from the Snake river section was running between 20 and 50 grains to the head with spring plantings. This is said to mean, with the stand obtained in that

region this year, from 30 to 35 bushels to the acre of this variety. Some hybrid fall sown wheat is reported to be running from 50 to 100 grains to the head with a yield indicated of from 40 to 45 bushels to the acre. This wheat lies a few miles northwest of the city.

The committee has sent a circular letter to the miners urging their cooperation in forming the organization.
