When news of his inheritance reached Mr. Murphy he declared that business would go on as usual and he is still "one who toils."

partment of Keeler Bros., left this morning on No. 19 for The Dalles.

His family, who accompanied him to the Utah city, will return next Sunday, accompanied by George Kirby, a brother, of Idaho Falls, who will remain here until after the Round-Up.

Ed Eben, well known merchant of Joseph, accompanied by his son, Morris Eben, arrived here by motor at midnight last night after a hard trip over the mountains. They were stuck several times in the soft roads between La Grande and here. The sid-

The sessions of this body are not complete without Mr. West's attendance.

DECEMBER WHEAT

(From Overbeck & Cooke Co.)
CHICAGO, Sept. 12.—Wheat—There was an active commission house demand for futures all day and with the exception of one brief period, when some selling came into the market, influenced by reports of large purchases in the west at lower prices, the market displayed practically no reactionary tendency. The same class of buying by the seaboard was also in evidence and although it was claimed that little new business had been consummated because of the adverse foreign situation, the tremendous clearance reports for the past few weeks had their effect. Since July 1st there has been cleared out of this country for other shores nearly 100,000,000 bushels and it is still going at an alarming rate. The increase of 1,540,000 bushels in the visible attracted little attention. Cash prices were higher with a good demand from outside mills. There is little prospect of any important decline in futures, at least until the supply shows some balance of overtaking the demand.

Corn—Had a strong tone all day, led by cash and the current delivery which again displayed signs of tightness. Receipts of 275 cars met a good demand at advances of one cent to two cents despite reports that eastern industries had closed down. There was no reason given for the latter. Country offerings were said to show considerable increase particularly from sections of the belt where corn is well advanced and not likely to be hurt by frost. Temperatures over Sunday were favorable but considerable territory received further rains which are detrimental to the progress of the new crop. The feat of frost is paramount and, in our opinion, will have a strengthening influence on the futures, especially as the technical position is such as to make the market more than ordinarily susceptible to bullish developments.

Oats—This market was again an interesting affair, follow the action of corn in a small way. Cash market started strong but later broke to 1 cent under Saturday's close. The increase of 2,418,000 bushels in the visible supply was larger than expected and encouraged selling pressure. At the moment there is nothing in the outlook upon which to base prognostications of individuality.

Rye—There was more interest noticeable in futures than for some time past and the buying market advanced in sympathy with wheat and under the leadership of buying by houses with seaboard connections. Cash rye firm with ales of No. 2 at 2 cents over September. December rye at its prevailing discount under wheat looks an attractive speculative investment.

from bear sources. A report that wages of the sheet mill workers in the Youngstown district were reduced stimulated much of the selling in Hep iron and steel. The natural assumption was that this indicated a slowing down in business at that point, but the wage reduction, it was later reported, was based on a falling in the value of the products being manufactured. In other portions of the stock list much firmness was manifest and the action displayed in many departments indicated underlying firmness rather well liquidated condition. The showing of the Federal reserve system on Saturday was better than the street anticipated and the reported ending of the \$200-million outlay switchmen's strike at Chicago in conjunction with the indications of a return of miners in some of the strike affected districts did much to promote a better feeling. Money ruled at 7 per cent during the day and it is now thought that after the current week, the monetary situation will be less acute. Signs are not lacking of a more confident feeling with respect to trade doings and with this in view it does not seem illogical to venture the opinion that stocks in the majority of instances should be purchased at favorable opportunities. Some of the railroad stocks were in good demand today and it would not be surprising to see a resumption of the upward movement take place in this department at an early date.

FRANCE AND BELGIUM INSTITUTE ALLIANCE

PARIS, Sept. 12.—(U. P.)—The Belgian minister today notified the French foreign office that the Franco-Belgian military alliance has been officially accepted by Belgium and will become effective immediately.

While terms of the Franco-Belgian alliance have never been made public, they are supposed to provide for both defensive and offensive agreement whereby Belgium would immediately join France if the latter want to war. If such terms are accepted, Belgium "neutrality"—violation of which by Germany caused Britain to enter the war—will be abolished. Germany would have the right to invade Belgium in event of another war with France. Reports from Belgium two weeks ago indicated that the labor element there prevented the government from ratifying the treaty. Under provisions of the league of nations the treaty must be made public before it can become effective.

PASTIME TODAY

St. Louis Monday.

HEL-LO-o-o-o PETE:

In two more shakes of a lamb's tail I'd have been between the sheets—but I got taken with another large idea for Camel Cigarette ads that's so bright you can phone 'em to cut the current because you just had your lamps lit!

Tell you, it's a whale of a stunt! Everybody right quiet—and hats off! NOW—far as I know or ever heard, there never has been one of those zippy slogans under that big display name "Camel". I'VE GOT ONE—get me? Put both your ears close to the ground and get the rumble of a broadside like this:

Camel
Once it meant an animal—
now a Cigarette!

Wow, Pete! I'll testify that's a stoneless peach! Spread it like I've dented it in here—and you've uncorked an eye-ful! Suppose you'll want to call me old Mr. Hammer because I hit the nail on the head!

And, bet real money that if this slogan stuff keeps me awake the rest of the night, I'll wire and offer it to R. J. Reynolds Tobacco Co. before you hit the deck! And, I'll be spending some of the proceeds for noon eats! In the "lang-wage" of Jigger Jones of Joplin, you tell 'em old yacht, you've got the sales spirit!

Blowing out of St. Louis at 10.12 tomorrow with a bundle of business. Off for Ohio. Got something on me mind!

Till I get it off—

Shorty. Ex-TRY! Ex-TRY!
Just got a wire, I sold 'em that slogan! Pete, Eat on me! S.

Superior Diamonds

Superiority in Diamonds is a matter of careful discrimination; in which the character of the house should be taken into consideration.

Very few occasional diamond buyers are competent to judge values where minute variations, invisible to the naked eye, have considerable bearing upon their worth.

We gladly show diamonds and give you the benefit of our knowledge and experience.
