ATLANTA, Ga., Oct. 6.—(A. P.)—

Destruction of several cotton gins and business houses in the cotton belt after anonymous threats were received by operators and businessmen to cease activities while cotton was selling at what many farmers termed as prices below the cost of production has resulted in the placing of armed guards around several gins and the closing of

business in least one community. The burning of the second gin in the Stamford, Texas, territory within two days was reported last night. The general mercantile establishment of Taylor and Barnett at Hanceville, Alabama, was destroyed, yesterday after the proprietors ignored orders to close business until cotton sells at 40 cents a pound.

EFFORT OF JAPAN TO CONTROL CABLE SEEN

WASHINGTON, Oct. 6.—(By A. L. Bradford, U. P. Staff Correspondent.)—Efforts by Japan to control a cable across the Pacific between the United States and Japan came to light today. Proposal was made some time ago with approval of the mikado's government that the United States and Japan cooperate in building a cable. The proposal is considered significant here due to the possibility of the Japanese delegation bringing up the plan again at a preliminary meeting here Friday of five great powers in connection with the international communications conference. Building of the cable was proposed to the state department by an emissary of Japanese capitalists. It was sponsored by the Tokio government. The cable would facilitate commercial relations and better diplomatic understanding between the two countries, it was argued. The state department pointed out that the Japanese government forbids landing of foreign cables on Japanese shores and declared that the United States could not allow landing of the proposed cable on American soil if controlled by foreign interests.
