Bothwell Avison Hurt
Bothwell Avison, son of Mr. and Mrs. E. T. Avison, formerly of this city, received serious injuries to the vertebrae of his back in an automobile accident which occurred recently in Oakland, California. He has been placed in a plaster cast and it will be necessary for him to remain so for some time. Mr. and Mrs. Avison who have been living in Oregon City, have gone to California to be with their son.

Traffic Cases in Court
Traffic cases, which have been scarce during the first half of this month, occupied space on the police court blotter this morning. John Doe was accused of speeding and forfeited \$5. Richard Roe paid \$2 for having parked too long at the Main street curb. A forfeiture of \$5 from a man giving the name McLaughlin was listed. He drove his car over a fire hose.

High School Loses Athlete
Russell Bradley, diminutive second string quarterback on the high school football eleven, was lost to the local squad last week end when his parents removed from Pendleton to Enterprise, from whence they came last year. Bradley had played in both games thus far this year and showed lots of ability for his size. He was a dependable man on defense and a deadly tackler and his loss to the squad is keenly felt.

Eight Inches of Snow Falls
There are eight inches of snow in the mountains south of Pilot Rock today, L. C. Scharpf reported today. He returned last night from a weekend trip to the Elkhorn cabin near Lehman springs and said that snow fell all day yesterday. The snow line extends as far down as Mountain Home. Sheep are all out of the mountains, Mr. Scharpf says, and are on the lower pastures, which are at the best they have been known in more than two decades.

"A Word to the Wise is Sufficient"
I wish to refer those who have expressed themselves as "believing I am crazy" for having taken the grief stricken family of the prisoner Kerby into my home; to the 13th chapter of First Corinthians.

And those who are so outspoken in their censure of me, for having taken food to the boys in jail, might read the 25th chapter of St. Matthew, 31 to 46 verses, and see what Jesus says; for if you are really overcome with shock and horror at such an act, I believe the reading of this, will soothe your shattered nerves, and save you the trouble of sending to your druggist for smelling salts.

I will also say, to those who have expressed themselves as "knowing I am related to the Kerby family," that the habit of manufacturing lies is so strong upon you, you have ceased to use even a remnant of truth in your output.

It is really surprising to know that in this enlightened age, there still are those who are not awake to the fact that some one, may do a charitable act, without being prompted by a selfish motive.

Wake up you Scribes and Pharisees, brush the cobwebs from your brain, you are not now living in the dark ages. Read St. Matthew 23rd chapter. Yours charitably,
MRS. W. H. ROBERTS (Paid Advt.)

MR. HARDING
There is not a man in all this land who can keep his eye on me. For I may be upon the land, or yet upon the sea. For there I come, says Harding, and there I go says he, I may be down in the bottom of a well, Or yet way up a tree.

CHORUS
I'll be damned if I don't say Harding; I'll be damned if I do, says he. There's not a man in all this land Who can keep his eye on me.

I may be for the League of Nations. Or yet may be agin, for being Mister Harding. You know I cannot sin. For there I come, says Harding, and there I go, says he. I may be found upon the land, Or yet upon the sea.

CHORUS
I'll be damned if I don't say Harding; I'll be damned if I do says he. For there's not a man in all this land Who can keep his eye on me.

THE LEAGUE, says Harding; I'm agin THE LEAGUE, says he. For there's not a man in all this land Who can change as quick as me.

CHORUS
Now all should vote for Harding; It's quite plain, don't you see That if he is not upon the land, He's plainly "up a tree."

RUMELY IDEAL

Keeping the Straw on the Move

WHEN we designed the Rumely Ideal thresher we knew "where we were going"—We knew that the biggest trouble in threshing always has been bunching, winding of the cylinder, choking up. We knew that anything that impedes the flow of straw prevents perfect threshing.

So we designed the Ideal on the principle of a steady even flow of straw through the machine—from the time it enters at the cylinder until, free of all the grain, it leaves the machine through the stacker.

Follow the straw through an Ideal. Notice the size and weight of the cylinder and the relative position of the grates,—that in the Ideal the grates are not placed half way up around the cylinder but right behind and beneath where they allow the cylinder to relieve itself of the straw at the most natural point—the bottom—before the cylinder starts on its upward turn.

Then see how that patented Ideal traveling rake works—taking the straw from the cylinder and delivering it to the straw rack in that same steady even flow—all the while separating the grain from the straw because the rake is slatted.

You'll find the Ideal straw rack different from others—instead of relying upon shaking alone there are sets of lifting fingers that tear the straw open—rake it—beat it from beneath.

And to guarantee perfect cleaning there is a chaffer in the cleaning shoe as well as in the grain pan—no overloaded shoe and a cleaning system that not only delivers clean grain but takes care of the big capacity for which every Ideal is noted.

We have a catalog for you that tells everything about the Ideal, which is built in five sizes, 22 x 36, 28 x 44, 28 x 48, 32 x 52 and 36 x 60.
