Graveling of Street to Start

Graveling of Garfield street from Jackson street north three blocks, is to begin Monday, City Engineer P. B. Hayes said today. This is preparatory to paving which will be laid by the Warren Construction Co. The company is getting the rock quarry on the gravel bar below Walters' mill in shape for operations and has promised to have a paving outfit here within a week to 10 days. Garfield street is graded and curbs are in, ready for the hot stuff as soon as the gravel base is laid. Graveling on Mark street, from Matlock to Bush, has also been started and it probably will follow Garfield street in the paving program.

60 PERCENT OF 1920 WHEAT ALREADY SOLD SAYS LOCAL DEALER.

Average Price Obtained by Umatilla County Farmers Estimated at \$2.20; Present Holding of Grain is General.

Sixty percent of Umatilla county's 1920 wheat crop has been sold by the farmers and moved, H. W. Collins' local dealer, said today. With the exception of a few crops, little wheat has been sold here since the Round-Up.

The farmers who have sold their wheat have obtained an average, Mr. Collins estimates, \$2.20 per bushel on the No. 1 basis. Some contracted before harvest, at \$2.50, while others took the \$2.20 to \$2.30 which marked the high mark on the local market. There has been virtually no wheat sold in the county under \$2 No. 1 basis.

All Sections Are Holding. Wheat now in the hands of farmers could be moved if the farmers were willing to part with their crop at present prices. Here as elsewhere the growers believe that the price is too low and will not part with their grain. Letters and wires from all sections indicate that the condition is the same.

Receipts of wheat at Chicago are averaging only 10 to 15 cars a day now, with that city the center of a great wheat selling area. Locally there is nothing moving and dealers are forced to await a change in the market before they can hope to do business with the growers.

Strike Brings New Drop. The coal and railroad strikes in England, which caused a break in foreign exchange, are responsible for the latest drop in the Chicago market. Chicago is governed largely by British prices and the local and coast market, in turn, follows these larger markets.

Grain authorities predict that the big drops which have characterized the market cannot continue. A return to a price somewhat corresponding to the old level is predicted. There is no surplus of wheat in the world, the authorities say, and with this condition there probably will be a return to normal.
