Children Are Inspected.

Tutuilla babies who were inspected and scored last year, were examined yesterday by Mrs. Edith G. Vandusen, home demonstration agent and Miss Lottie Lane, specialist in nutrition for children. They found that several of the children had improved but that there were about 10 children still underweight. Mothers were given advice as to how to improve the physical condition of their children.

Fire at Midnight.

A midnight fire at the Pendleton Marble Works, on the corner of Court and College streets, was started from smoldering leaves which had been left to burn unattended. Fire Chief William Ringold was summoned by a telephone message and had no difficulty in quelling the blaze. No damage was done. Chief Ringold warns local people to use every precaution when burning leaves. He is emphatic in advising that piles of burning leaves be closely watched to prevent the spread of fire.

Vocational Guidance Theme.

An inspirational talk on vocational guidance by Mrs. Jean Norris Ellis will be given Monday night at 8 p. m. in the county library auditorium to Pendleton girls and women over 15 years of age. A musical program is being planned to supplement the talk by Mrs. Ellis.

New Weeds Discovered.

Weed growth which are new to this county have been discovered and Fred Bennion, county agent, has sent samples to O. A. C. to discover the variety of the weeds and find means of killing them. It is thought the weed seeds were brought here from California in feed barley. One variety, a type of mustard, was found by L. E. Penland, while a second kind, of the hure type, was found on the W. E. Steen ranch in the Blue Mountain region. Both weeds are of luxuriant growth and seem to be very malignant, says Mr. Bennion.

the gate post at the Frank Michael ranch near Pilot Rock yesterday has not been identified. The body was brought to Pendleton by Coroner J. T. Brown who is attempting to find a clue to the identity of the suicide. The man who was deaf and dumb, had eaten breakfast on Monday at the Michael ranch and had given the information that he was from Oregon City and that he had become separated from a party of campers in Fly Valley and had lost a black team. The body was discovered by Charles Calahan, of Pilot Rock. Twenty cents and three knives formed the contents of the pockets in the dead man's clothes. It was thought for a time that he was the man who is missing from Oregon City but the body does not tally in all particulars with the description of the Oregon City man.

Details of Death Told.
Details of the death of Margaret Sones, aged 15, formerly of this county and a daughter of Mr. and Mrs. P.

H. Sones, arrived in Pendleton today from F. E. King, who states that the girl was killed in an auto collision at Long Beach when a car driven by Mr. Sones collided with one driven by Mrs. Roy Bartow, of Long Beach. The girl died before reaching the hospital, a basal skull fracture causing her demise. Mr. and Mrs. Sones and

Mrs. Bartow were badly cut by flying glass. The car driven by Mr. Sones was bound for Long Beach and after crossing the bridge attempted to pass a car in front. The road was narrow at this point and evidently Mr. Sones became confused at the presence of the Bartow car traveling north. Since leaving this county the Sones family resided in Long Beach later moving to Los Angeles. At the time the accident occurred

they were going to Long Beach to visit and take dinner at the home of Mr. Sones' brother, George Sones, a Long Beach.

To have a clear, pink skin, bright eyes, no pimples, a feeling of buoyancy like childhood days, you must keep your body free from poisonous wastes. They start the bile and overcome constipation. That's why millions of boxes are sold annually, 15c and 30c.

They are unanimous in their satisfaction.

Since the very beginning of electric washing history, the Thor has been the leader. The vast resources, experience and mechanical genius of the Hurley Machine Company have been concentrated on two things: To keep the Thor secure in its rightful position, through superior performance; to manufacture enough Thors to supply the growing demand.
