From a great basket fashioned of pink crepe paper, there nodded a host of ragged chrysanthemums in white and shades of orchid. FIVE FAMILIES TO 4

HOMES 1925 PROSPECT

CHICAGO, Nov. 10.—(U. P.)—Estimating that there will be five families for every four homes in 1925 unless building is speeded up in the United States, Wharton Clay, housing expert, declared today that congress must pass legislation to encourage building. Clay who will appear before the United States senate committee on reconstruction and production, which opened a two day inquiry here into the housing situation in the Middle West, estimated that several million families are now doubled up, and that it will be necessary to build 2,000,000 homes in the next five years to keep the housing shortage from going beyond the present level.

HOME LACK IS LAID TO BUILDING LOAN SHARKS

CHICAGO, Nov. 10.—(U. P.)—"Building loan sharks," the income tax law, "profiteers' greed," are a combination which must be smashed if the shortage of several million homes in the United States is to be met, witnesses testified today at a hearing before the United States senate committee on reconstruction. The hearing was the first of a number which will be held throughout the west. President Baird, of the Chicago Association of Commerce, testified that builders have to pay as high as 17 per cent interest on mortgages. Senator Kenyon, during the hearing, denounced profiteers as the cause of the home shortage.

"The home shortage is not caused by the high wages paid labor, as has been generally attributed," said Kenyon. "Greed is the cause of it all—greed's greed. Let us send a few of them to jail."

Baird declared that the federal tax on mortgages should be abolished to encourage big capitalists to invest in building mortgages. "Big estates and insurance companies which in the past have invested their surplus in real estate mortgages, have not only stopped doing so but are selling the ones they have, and are placing the proceeds in other sound securities," said Baird.

The testimony brought out disclosed that window glass is now selling for three times its prewar value; that lumber and other building materials have jumped 200 and 400 per cent.

HUERTA ACTS QUICKLY TO AVERT WALK OUT

MEXICO CITY, Nov. 10.—(U. P.)—President De La Huerta acted promptly today to prevent a general strike in the federal district which was voted last night amid cries of "Viva Huerta." The strike was voted by communistic federation of the Mexican proletariat, representing 17 of the most important labor unions, in sympathy with Vera Cruz dock workers. Huerta announced that the government will take over the Vera Cruz docks, granting the stevedores' demand and operating business until an agreement can be reached by the government, workers and ship owners. The strike was to become effective if the stevedores did not obtain the wage increases and working conditions demanded.

PRICE SETTING UNION OF FARMERS FORECAST

BOSTON, Nov. 10.—(A. P.)—Establishment of "nation-wide selling organizations which shall fix the price of farm products" if the farmer does not receive the "same pay for the same hours of work that others receive," was predicted today by Sherman J. Lowell, master of the national grange of the patrons of husbandry, in opening its annual convention. "There is no threat in this, we have been driven to it to preserve our ag-
