THE FORDSON FARM TRACTOR

The Fordson is all the power plant that is needed on the average ranch.

It has abundant power to handle all the work, large and small. It is quickly moved from place to place and lined up.

It is the logical power for summer fallow work. It will handle the discing, harrowing, blading and seeding quicker, easier and far cheaper than mules.

Remember, the Fordson Tractor uses common kerosene for fuel.

Let us demonstrate on your own farm. Let us show you the advantages of the Fordson over the old way of curing for your land.

Let us show you how and why it is quicker and cheaper. It is a pleasure for us to demonstrate the Fordson.
