FIRE LOSS IN 1920 IS RECORD OF EFFICIENCY

Three months without a dollar in fire loss and two months without an alarm being turned in are two outstanding points in the record of Pendleton's fire-prevention efficiency in the year 1920. The total loss from fire during the year was \$12,950, \$9700 of which was sustained in three fires. February, June and November passed without a dollar's loss from fire. In August the six alarms that were turned in resulted in only \$25 loss. December had four alarms and \$125 in damage.

There were only 33 alarms during 1920, as opposed to 54 for the year previous. Both in the number of alarms and in the loss sustained, there was a decrease, showing that the continual fire prevention propaganda spread by Chief William E. Ringold is having an effect for good. Considerable new equipment was added to the department in the past year, including a safety net, additional hose and other appliances. The year 1921 will see a new fire truck with a jumper plant, added to replace the present out-of-date truck.

The record for the past 12 months, as taken from the fire chief's official reports to the city recorder, are as follows:

Month	Alarms	Loss
January	2	\$ 840
February	1	0
March	3	2,500
April	1	600
May	2	600
June	0	0
July	4	5,000
August	6	25
September	6	200
October	3	1,200
November	0	0
December	4	125
Total	33	\$12,950

Between May 11, and July 9, a period of 59 days, and between October 24 and December 9, a period of 46 days, there were no fire alarms turned in to the Pendleton fire department.

The trunks of living trees may be utilized at times in place of sending and receiving antennae for radio apparatus. This will be of great benefit to aerial forest fire patrol companies in time of fires.

The business community of Germany believe that the German fleet betrayed the Fatherland and caused its ruin and consequently no German trader or shipowner will employ former naval officers, even those who served on warships in the battle of Jutland.
