IMITATION HEAVEN SET UP BY ZION ZEALOTS
ZION, Ill., Jan. 20.—(A. P.)—In the general clean-up that is going on in the City of Zion, all slangy, profane, cheap vaudeville phonograph records have got to go.
"If any of you have those records in your homes you are sinning against God," said Overseer Voliva, "and if you hear any such records in Zion Home (the big 250 room hotel) I'll smash the records and throw them out the window. It's disgusting to hear some of these trashy records, such as 'Our Josh's records where he swears. Come on Zion! Let's burn up these records! When you buy records, buy records with some sense to them!'"
The next in line for clean-up is Sabbath Desecration. It has come to Overseer Voliva's ears that some young people have gone auto riding on the Lord's Day. The result is that Voliva has given orders that no taxi-cab was to leave the hotel on Sunday except to go to and from church, or to "go on God Almighty's errands."
Shaking back onto the matter of women's dress once more, Voliva gave warning that if he attends another wedding where women are not properly dressed he will put on his hat and depart.

GREATEST CORN YEAR IN HISTORY OF COUNTRY

WASHINGTON, Jan. 20.—(A. P.)—1920 was the greatest corn year in the history of the country according to the records of the Department of Agriculture. Besides growing a record crop of 2,222,367,000 bushels, the farmers established a new record for average yield per acre with 29.3 bushels, the second time in history that the country's average yield went past 20 bushels.
The area planted to corn last year was 104,691,000 acres which was smaller than the area planted in eight other years heretofore and 1,400,000 acres smaller than the area which produced the previous record crop of 2,125,744,000 bushels in 1913. Last

year's crop was the third to exceed 2,000,000,000 bushels.
Iowa, the country's greatest corn producing State, made an average of 46 bushels to the acre for the first time in its history. The highest average acre yield of any State was that of Vermont with 47 bushels. Main in 1919 had the highest average acre yield with 60 bushels. In the ten years previous to that year the highest average acre yield has been made by one of the New England States. Connecticut had highest yield in six of the ten years, Massachusetts in two, New

Hampshire in one, and Vermont and Massachusetts tying in one.
WHEAT DECLINED AND FAILED TO RALLY IN CHICAGO
CHICAGO, Jan. 20.—Wheat declined today and failed to rally despite news of active foreign buying. Unusual lack of support was shown. The market closed 1/16 to 2 3/4c net lower with March 1.72 1/2-1.72 3/4 and May 1.64 1/4-1.64 1/2. Corn lost 3-5/8 1-3/8, oats 1-4 to 1-2 3/8 and provisions 7/8-15.
Bears had the advantage in wheat,

owing more or less to a current opinion that January is a month of declining prices. Prospects of enlarged shipments soon from the southern hemisphere were also the subject of considerable attention. Renewal of gossip that the Italian government was re-selling wheat tended further to depress the market and besides these conditions in Europe. The resulting downturn led to export buying estimated at 1,500,000 bushels to be shipped from the Gulf of Mexico. A better domestic milling demand was also

noted. Nevertheless only a moderate amount of the setback in prices was overcome.
Corn and oats for immediate delivery touched the lowest price level since 1916. Liberal receipts of corn were chiefly responsible.
Provisions were weak in sympathy with grain.
