How did the Wright Bros. do it? The invention, construction and practical use of the flying machine by the Wright Bros. was not a mere-or-hit proposition. It was the painstakingly working-out of every detail, failures and trying-again. But worst of it all was the ridicule of the people, for they lightly conceded them "slightly touched." It was always so: Anyone who has the courage and pluck to get out of the common drift or Maclstrom, follows a different course and by will-power and thrift works out his own scheme, is usually scorned. What is your course of action, your plan? Make up your mind and save, it is the real beginning of success. A Saving Account in this strong bank kept up persistently will give you will-training. Try it. The American National Bank Pendleton, Oregon. "Strongest Bank in Eastern Oregon"

Where Harding Is Spending Vacation These scenes show where President-elect Harding is spending his pre-inauguration vacation. On the left is the entrance to the Ponce de Leon Hotel, at St. Augustine, Fla. The "Harding wing" of the hotel is shown on the right, the arrow ring indicating Harding's suite with balcony overlooking a beautiful garden. Below is the luxurious yacht Victoria, owned by Senator Frelinghuysen and named for the senator's eldest daughter. It is 83 feet long and has two 50 h. p. engines and a wireless power. Harding is expected to cruise until early February and then return to the Ponce de Leon for most of that month.
